## **NEXT-LEVEL POWER**

### **IT'S IN OUR DNA: PRUNING, CUTTING AND HARVESTING TOOLS FOR PROFESSIONALS**

We've been crafting tools since 1886 and pruning tools since 1934. Entrenched in our DNA is a profound understanding of the needs and experiences of those who use our tools every day. Designed by professionals, for professionals, our highly reliable electric secateurs, chainsaws, and olive harvesters are grounded in years of extensive research and cutting-edge technology.

Our tools deliver sustained, unparalleled performance and efficiency, enhancing comfort and safety to make working in your vineyard, orchard, or ornamental garden much easier. They offer *next-level power*, meeting even your most challenging requirements and boosting productivity. Whether it's light pruning, intensive cutting, or demanding olive harvesting, our range is designed for a multitude of viticulture, fruit growing, and horticulture activities.

## **EXPERIENCE THE POWER AND MAXIMISE EFFICIENCY**

Whether pruning with our heavy-duty secateurs, or our new cordless system, our sturdy yet lightweight designs and high-performance brushless motor ensure a high degree of comfort and precision, even when cutting extremely hard wood. Our new cordless secateurs are equipped with state-of-the-art brushless motors and advanced electronics, providing endless power and exceptional cutting speed. Their high-quality SK5 Japanese steel blades feature a polymer coating for extra durability and rust resistance.

While all secateurs feature a progressive trigger and two pre-determined blade apertures, the BCL235 and BCL240 models also allow you to adjust the blade aperture to your desired cutting capacity, maximising efficiency and productivity.

When it comes to more demanding tasks, our BCL15IB chainsaw is the ideal solution for cutting branches up to 110 mm in diameter. It works seamlessly with either our cordless secateurs BCL240 or our heavy-duty secateurs BCL24. The combination of our chainsaw + BCL24 is perfect for olive tree pruning, for example, while our range of olive shakers achieve efficient harvesting before pruning your olive trees.

# BCL23

**WORK ALL DAY LONG  
WITH EFFORTLESS  
PRECISION**

Our powerful BCL23 secateurs set the standard for intensive vine pruning, allowing you to prune efficiently with exceptional comfort, precision, and cutting power. Turning heavy pruning into light work, they effortlessly cut through branches of all sizes and wood types, from soft to very hard.

BCL2B1

The BCL23 secateurs comes with a 147 Wh battery. The comfortable, ergonomic carrying system connects easily to the belt with a clip.

Heavy-duty secateurs  
BCL24/BCL23

The holster is made from strong wear resistant material. It holds the secateurs securely when not in use, and features an opening on the top to attach it to a belt. Designed to be worn both on right and left hip.

## WORK A FULL DAY WITH THE 43.2V LITHIUM BATTERY

This battery provides exceptional cutting power, allowing for intensive use. Its low energy consumption, combined with the high-performance brushless motor, ensures at least **one full working day of use**. The integrated control unit is user-friendly, displaying the number of cuts and remaining battery power.

**High quality chrome plated SK5 Japanese steel blade**

- Retains sharpness
- Reduced friction
- Excellent wear and rust resistance

**Non-slip soft grip handle for better grip and comfort**

**Comfortable grip suited for both left and right hand use**

**Accurate progressive trigger to control the blade movement**

# BCL24

## CUT THICK BRANCHES AND HARD WOOD WITH EASE

Our highly powerful BCL24 secateurs are the **benchmark for cutting and pruning very thick and hard wood**. They deliver excellent cutting power, ensuring a clean finish and precise cuts, even on exceptionally hard wood. They make heavy pruning feel effortless, particularly when working on stone fruit, olive, citrus, and nut trees.

The BCL24 secateurs come with a 294 Wh battery. The comfortable carrying harness is adaptable to multiple sizes.

# NEXT-GENERATION CORDLESS SECATEURS

Our next-generation of cordless secateurs provides next-level pruning, whether working in vineyards, orchards or ornamental gardens!

# NEW!

Features the latest designed brushless engines with advanced electronics for endless power and outstanding cutting speed. The high quality SK5 steel blade come with a polymer coating for even more durability and rust protection.

## POWER

Endless cutting power thanks to the brushless motor with state-of-the-art electronics.

## SPEED

Increased cutting speed to maximise efficiency and boost productivity.

## BLADE

New, strong single-piece forged SK5 steel blade for longer durability and less maintenance. The polymer coating provides extended corrosion resistance and low friction for a longer battery autonomy.

## BLADE ADJUSTMENT

Increase the lifetime of the blades using the new blade crossing control system.

## AUGMENTED TRIGGER SENSITIVITY

Progressive cutting, extreme control.

Easily choose the desired cutting capacity:

- **Option 1:** Close the blades for one second to choose between the two pre-set blade openings.
- **Option 2:** Use the progressive trigger to select any cutting capacity to maximise efficiency. Hold for one second on the desired blade opening.

**BCL226**

**BCL235**

**BCL240**

# BCL226

**GENTLE PRUNING  
UP TO 26 MM**

Our **extra compact secateurs BCL226** are ideal for fast and gentle pruning on small vines and thin branches.

High-quality SK5 steel blade.  
Extra wear- and corrosion-resistant polymer coating.

## TWO GREAT COMBINATIONS: CHAINSAW + SECATEURS

Our **BCL15IB chainsaw** and **BCL24 secateurs** are the ideal combination for intensive olive tree pruning. The chainsaw can be powered using the secateurs' batteries via a connection cable.

The **BCL15IB chainsaw**, paired with our **BCL240 secateurs**, is an excellent combination for pruning and cutting back fruit trees. The batteries for both the BCL240 secateurs and BCL15IB chainsaw are easily interchangeable.

# BCL52TP / BCL52FP

## MAXIMISE EFFICIENCY FOR THE OLIVE HARVEST

Our lightweight and easily manoeuvrable BCL52FP and BCL52TP olive shakers, equipped with powerful brushless engines, guarantee smooth operation during olive harvesting.

The optimal blend of material selection, weight, balance, and vibration not only reduces the impact on olives and branches but also enhances your well-being, reducing the risk of musculoskeletal trauma caused by the shakers' vibrations.

### BCL52TP

- Telescopic carbon fibre pole with adjustable length of 2,160–2,960 mm
- Maximum working range of 600 mm with combs opened
- Minimum vibration stress on olives and branches

### BCL52FP

- Fixed carbon fibre pole of 2,500 mm with additional 700 mm aluminium extension
- Maximum working range of 600 mm with combs opened
- Minimum vibration stress for olives and branches

### ACCESSORIES & SPARE PARTS BCL52TP & BCL52FP

## ENJOY A GREAT SELECTION OF PRACTICAL BASIC FUNCTIONS

Our **BCL51 olive shaker** provides all the essential functions and is an excellent choice for effortlessly carrying out all the typical tasks involved in olive harvesting. With its robust 2,300 mm aluminium pole and additional 1,000 mm extension, it allows for comfortable work at greater heights. The BCL51 olive shaker is supplied with a 14 m power cable for operation with a 12 V car battery system.

# WE TAKE CARE OF YOUR TOOLS

**DEDICATED SUPPORT, PROFESSIONAL SERVICE AND REPAIRS**

We have built a network of over 100 service and repair facilities across 15 countries, with an additional internal support network of three service and repair centres in France, the Netherlands and Spain. There, your tools will be maintained and repaired by qualified experts and with original spare parts. We want to help you get the best out of your tools and keep them working season after season. Proper maintenance and care will significantly extend their lifetime and reduce the overall cost.

For BCL23 and BCL24 from delivery date, providing the annual maintenance is carried out in a certified service centre after the first year. Consumables like blades, which are subject to "wear and tear", are excluded from the warranty.

For BCL226, BCL235, BCL240, BCL25TP, BCL15IB, BCL52FP, BCL52TP and BCL51 and all batteries. Consumables like blades, which are subject to "wear and tear" are excluded from the warranty.

## REGISTER YOUR TOOL!

Each of our Bahco electric secateurs, chain saws, and olive shakers has a unique serial number.

When you register your tool with us, you help us to keep track of the product. If there is a product notice or recall we can easily contact you with instructions on how to proceed. Moreover, you will be first to receive information on the latest upgrades, new accessories, or after-sales service learnings.
