做服务 TO SERVE YOU
WE ARE SERIOUS

我们是认真的！

有一种服务叫：一站式防静电解决方案

有一群伙伴叫：中国防静电协会

有一类合作叫：专业的人做专业的事~~~！

A kind of service: anti-static solution in one station

A group of partners: China anti-static Association

A kind of cooperation: the professionals handle professional issues

NEACHO 我们的优势

OUR ADVANTAGE

防静电技术要求参考标准：

防静电操作系统技术要求 QJ 1950

防静电安全工作台技术要求 QJ 2177

电子元器件制造防静电技术要求 SJ/T10630

电子设备制造防静电技术要求 SJ/T 10533

防静电贴面板通用规范 SJ/T 11236

防静电培训认证参考标准：

中国国家军用标准 GJB3007A

电子产品制造防静电系统测试方法 SJ/T 10694

美国国家标准学会/静电放电协会标准 ANSI/ESD S20.20

国际电工委员会标准 IEC61340

集团公司发展历程

DEVELOPMENT PROCESS OF GROUP COMPANY

- 
- 2018 宁楚全体伙伴再接再厉，勇攀高峰
 - 2017 东莞市宁楚智能科技有限公司成立
宁楚东莞公司成为中国防静电协会会员单位
获得防静电装备产品生产、销售、施工资质
静电防护智能监控系统相关专利申请
整体防静电工作台及附件相关专利申请
 - 2016 宁楚（上海）智能科技有限公司成立
主营防静电工作台、防静电装备产品的
研发、设计、生产、工程施工及销售
“宁楚”“NEACHO”品牌商标注册
宁楚上海公司成为中国防静电协会会员单位
自主研发防静电智能电动升降工作台
自主研发智能防静电多功能监控手腕带
 - 2015 江苏威利集团防静电原材料产品的突破
防静电树脂粉末，防静电指数稳定持久
防静电地板蜡，性能及稳定性优于国际同类产品
 - 2014 苏州威士利丁材料科技有限公司成立
引进多条全套数控自动化流水线，
包括水性涂装线、底漆封闭线、中涂
线、油漆金属喷涂线、UV转印线、
辊涂涂装线、复合冷压线，拥有年生
产保温装饰一体化板150万平方米的
生产能力
 - 2009 苏州家俊创业建筑节能有限公司成立
主营建筑装潢装饰、建筑智能化、机电设备
钢结构等工程
 - 2009 苏州市威利建筑涂料有限公司成立
专业生产合成树脂乳液涂料，包括丙烯
酸酯系列、硅丙系列和氟碳系列，内外
墙涂料、砂壁状涂料、真石漆及仿花岗
岩系列艺术涂料
 - 2000 “威利士”品牌商标注册
 - 1992 苏州木渎镇建厂

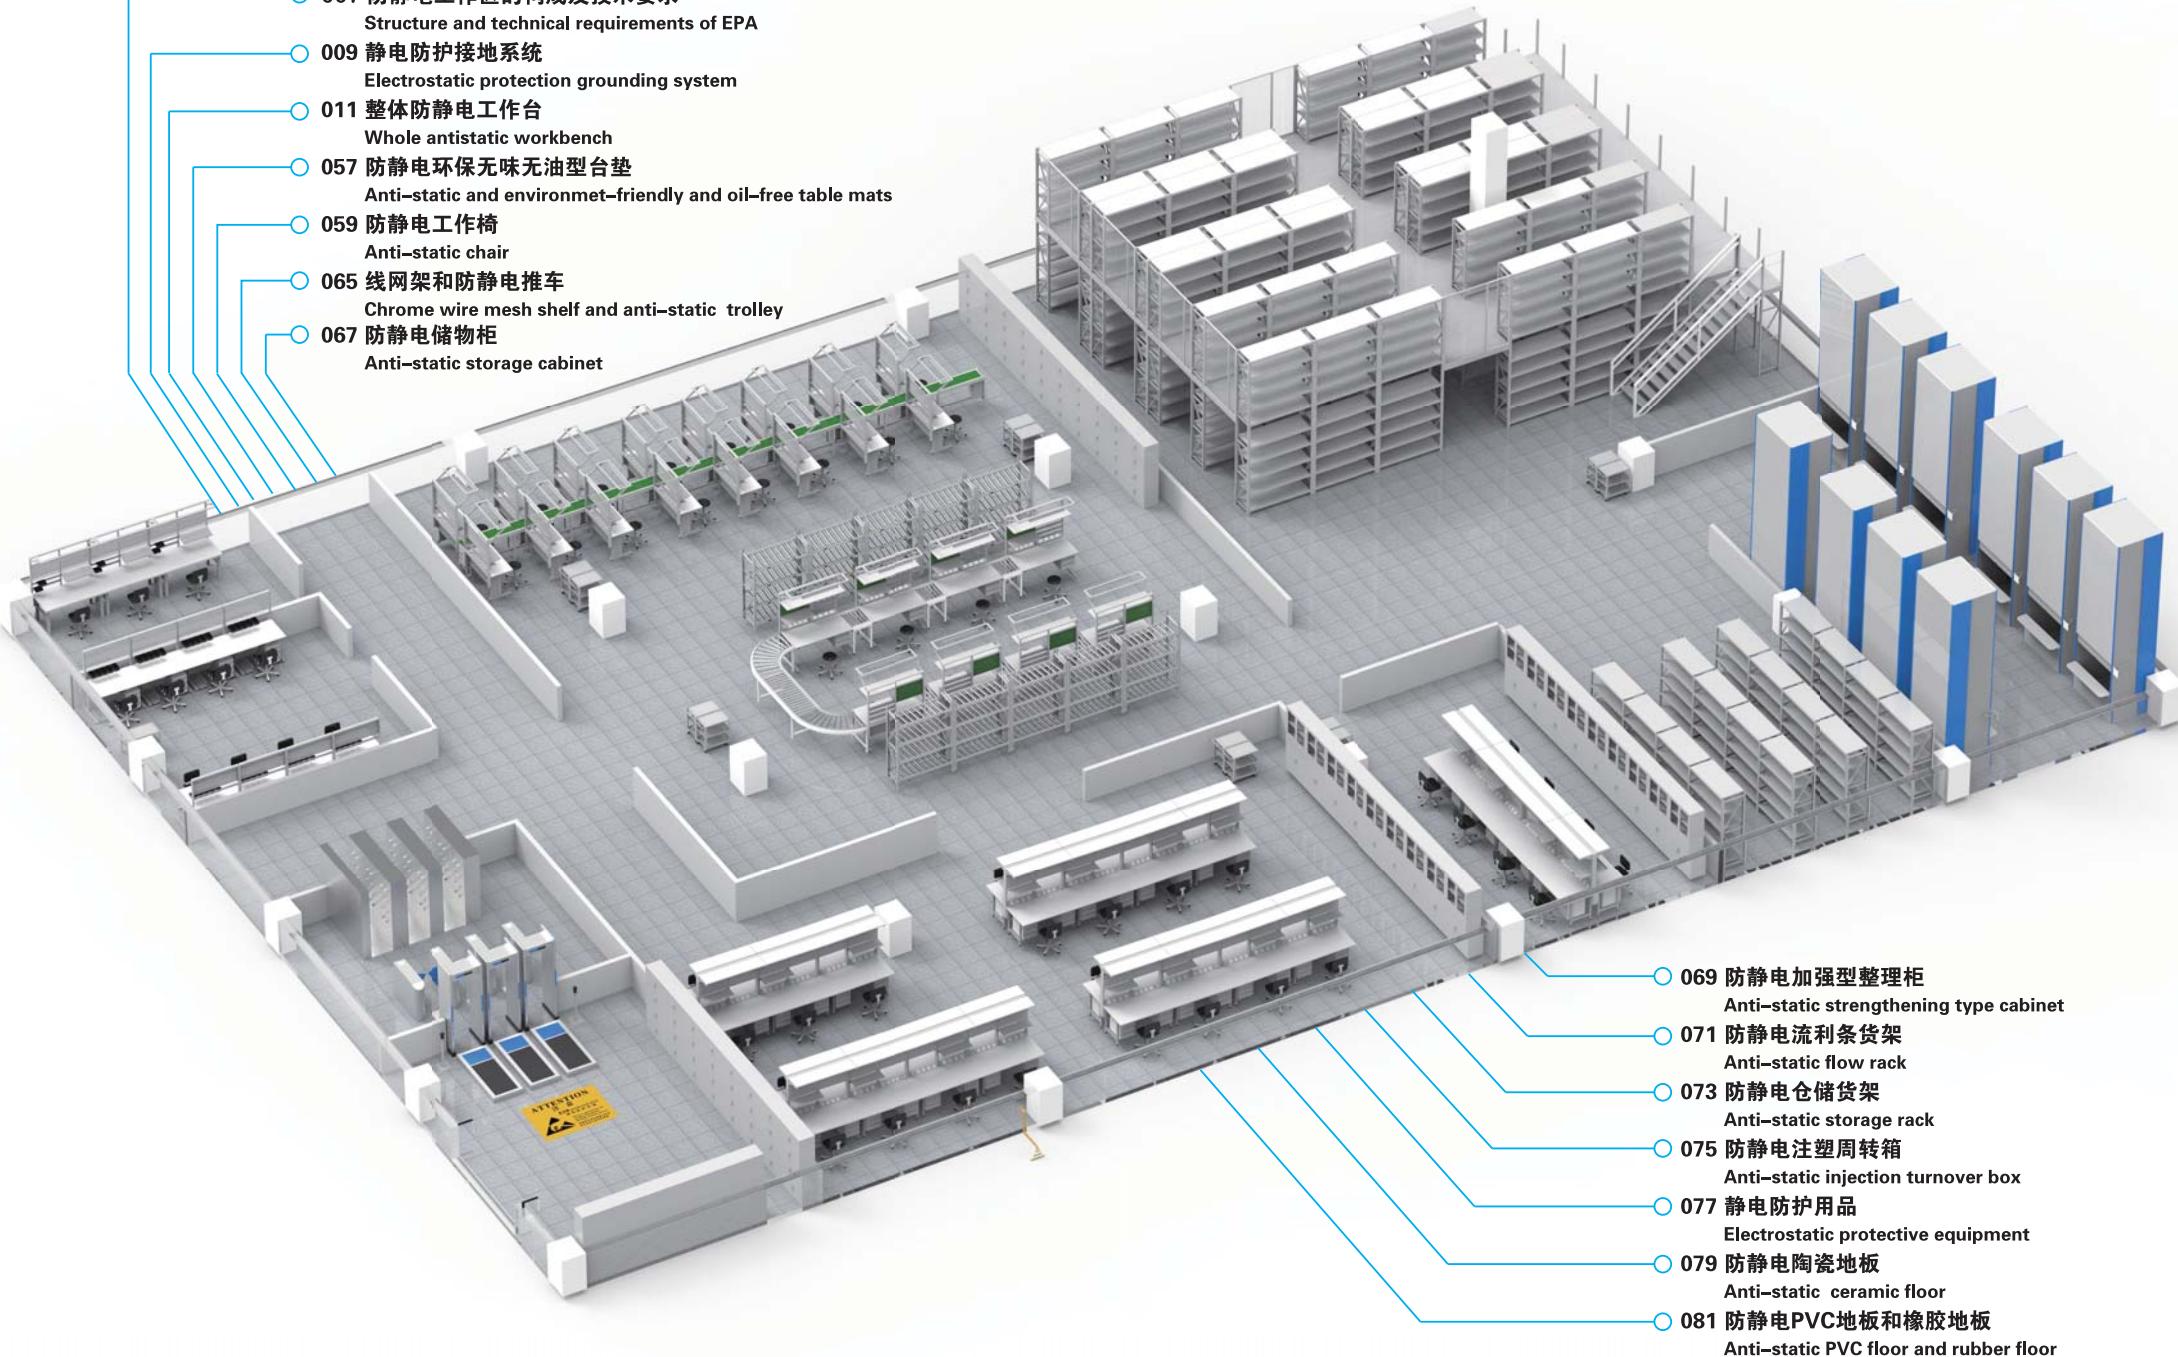

宁楚官方公众平台

- 01 26年工程项目规划实施经验
26 years of project planning and implementation experience
- 02 15年静电防护技术与现场应用实践经验
15 years of ESD technology and field application experience
- 03 专业、高效、快速的服务响应
Professional, efficient and fast service response
- 04 灵活的设计、研发、创新机制
Flexible design, research and development, innovation mechanism
- 05 规范的行业资源整合体系
Standardized industry resource integration system

- 007 防静电工作区的构成及技术要求
Structure and technical requirements of EPA
- 009 静电防护接地系统
Electrostatic protection grounding system
- 011 整体防静电工作台
Whole antistatic workbench
- 057 防静电环保无味无油型台垫
Anti-static and environment-friendly and oil-free table mats
- 059 防静电工作椅
Anti-static chair
- 065 线网架和防静电推车
Chrome wire mesh shelf and anti-static trolley
- 067 防静电储物柜
Anti-static storage cabinet

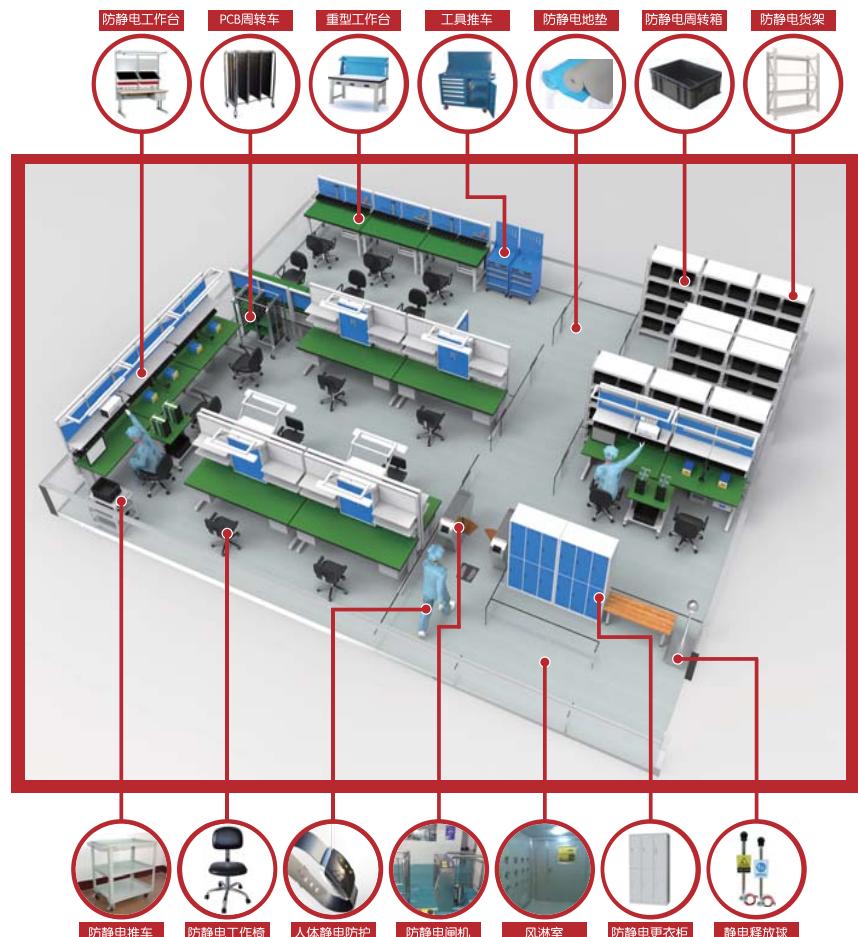

防静电工作区（EPA）的构成与技术要求

Composition and Technical Requirements of Electrostatic Discharge Protected Area (EPA)

防静电工作区定义：配备各种防静电装备（用品）和设置接地系统（等电位连接）、能限制静电的积累和电位、具有确定边界和专门标记的生产、维护、存储、使用、装配SSD的场所。通常EPA构建要求，GJB3007A里对HBM模型试验100V以上的SSD提供保护；ANSI/ESD S20.20里对CDM模型试验200V以上的SSD提供保护。

Definition of Electrostatic Discharge Protected Area: the place equipped with all kinds of anti-static equipment (supplies) and setting earth system (equipotential connection), the ability to limit the accumulation and potential of static electricity, production, maintenance, storage, use, and assembly SSD with defined boundaries and special markings. Usually EPA build requirements, GJB3007A provides protection for the HBM model test of the SSD above 100V. ANSI/ESD S20.20 provides protection for the SSD of the CDM model test above 200V.

EPA的硬件组成和要求：

- (1) 环境控制系统：温度16~28℃，湿度45%~75%，大气压强86~106KPa
- (2) 防静电接地系统：接地电阻 < 10Ω，交流阻抗 < 1Ω
- (3) 防静电地面：防静电地坪、防静电地垫、防静电PVC地板、防静电陶瓷地板等
- (4) 防静电作业必备装备：防静电工作台、防静电工作椅等
- (5) 防静电辅助装备：防静电推车、防静电货架、防静电周转设备、防静电周转容器等
- (6) 人体静电防护：专业的静电防护技术培训，防静电衣服、防静电鞋子、防静电帽子、防静电手套等
- (7) 静电监控系统：防静电智能监控手腕带、智能静电防护接地监控系统
- (8) 静电测量系统：人体综合测试仪、静电工程测试仪、接地电阻测试仪、离子平衡测试仪

The hardware composition and requirements of EPA:

- (1) Environmental control system: temperature 16~28°C, humidity 45%~75%, atmospheric pressure 86~106KPa
- (2) ESD grounding system: grounding resistance < 10 Omega, AC impedance < 1 Omega
- (3) ESD ground: ESD floor, ESD ground mat, ESD PVC floor, ESD ceramic floor, etc.
- (4) The necessary equipment for ESD operation: ESD workbench, ESD chair, etc.
- (5) ESD auxiliary equipment: ESD trolley, ESD rack, ESD turnover equipment, ESD turnover vessel, etc.
- (6) Electrostatic protection of human body: professional training of electrostatic protection technology, ESD clothing, ESD shoes, ESD hats, ESD gloves and so on
- (7) Electrostatic monitoring system: ESD intelligent monitoring wristband, intelligent electrostatic protection grounding monitoring system
- (8) Electrostatic measurement system: human body comprehensive tester, electrostatic engineering tester, grounding resistance tester, ion balance tester

EPA的软件与管理要求：

- (1) 制订静电防护培训大纲、定期组织人员培训、规范日常作业要求
- (2) 制订防静电工艺、工程设计文件与验收要求
- (3) 建立完整的静电防护质量保证体系（包含监督检查、试验、静电防护认证体系）
- (4) 防静电警示标识及管理，铺设静电防护警戒线，悬挂静电防护警示标牌
- (5) 静电敏感器件、元件或产品的包装、储存、运输
- (6) 产品的失效分析与记录，查找问题根源
- (7) 静电防护装备性能点检与记录，已失效装备需立即更换，避免产品风险
- (8) 接地及连接系统要求和指导
- (9) 所用SSD静电敏感度分级与使用指南

EPA's software and management requirements:

- (1) Formulating the training syllabus for electrostatic protection, training regular personnel and standardizing daily operation requirements
- (2) Formulation of ESD technology, engineering design documents and acceptance requirements
- (3) Establish a complete quality assurance system for electrostatic protection (including inspection, test, and electrostatic protection certification system)
- (4) ESD warning signs and management, the laying of electrostatic guard lines, suspended electrostatic warning signs
- (5) Packaging, storage and transportation of electrostatic sensitive devices, components, or products
- (6) Failure analysis and recording of products and finding the root of the problem
- (7) The performance of the electrostatic protective equipment is checked and recorded. The lost equipment needs to be replaced immediately to avoid the product risk
- (8) Requirements and guidance for grounding and connection systems
- (9) Guidelines for the classification and use of SSD's electrostatic sensitivity

静电防护接地系统

Electrostatic Protection Grounding System

电子工业的EPA独立的静电防护接地系统由接地电极和接地线共同组成。接地体是直接与大地接触的金属导体或金属导体组；接地线是用来连接接地物体和接地电极的导线。

电阻值不大于 10Ω (SJ/T10694《电子产品制造与应用系统防静电检测通用规范》)

The EPA independent electrostatic protection system of the electronic industry is composed of ground electrode and grounding wire. The grounding body is a metal conductor or a metal conductor contact directly to the earth; grounding wire is a wire used to connect ground objects and grounding electrodes.

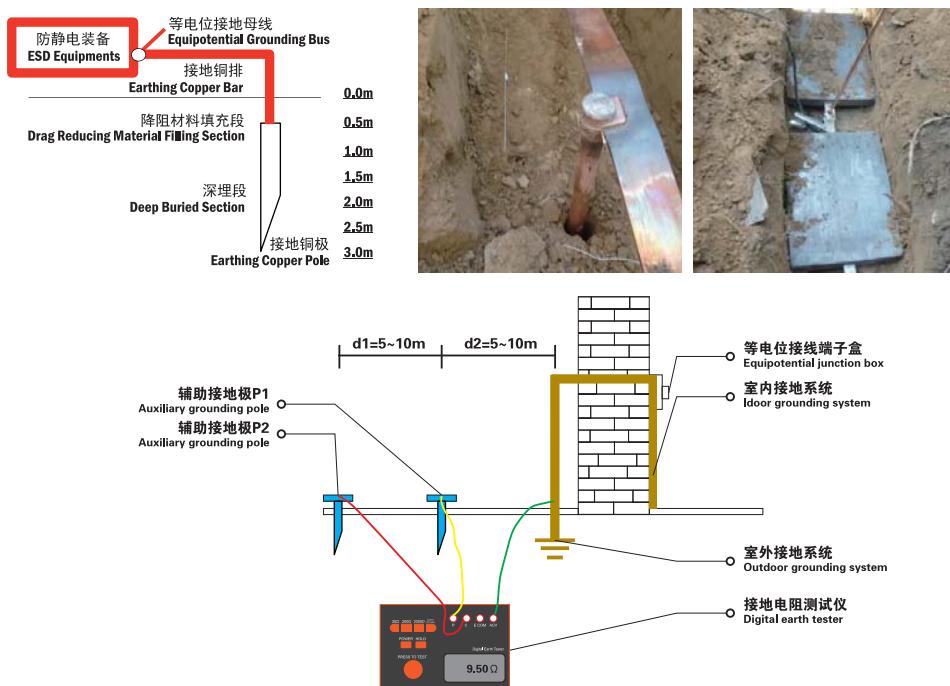

Resistance value is not more than 10Ω (SJ/T10694 "general specification for anti static detection of electronic products manufacturing and application systems")

EPA内接地的作用：

- (1) 接地点的电位被视为零电位，可作为各种电压信号的比较基准
- (2) 接地表面作为各种信号电路的返回电流的通道
- (3) 将电磁能量泄放大地，防止电磁辐射的干扰
- (4) 用来连接设备金属外壳，保护人员不受伤害

The electrostatic protection grounding requirements of EPA:

- (1) The potential of the junction is regarded as a zero potential, which can be used as a reference for a variety of voltage signals.
- (2) The passage of the ground surface as the return current of a variety of signal circuits.
- (3) Discharge the electromagnetic energy into the earth to prevent the interference of electromagnetic radiation.
- (4) It is used to connect the metal shell of the equipment, and the protection personnel are not injured.

EPA静电防护接地要求

EPA electrostatic protection grounding requirements

- (1) 在共用接地系统中，各类接地不允许混接和搭接，应联接到各自的接地汇流母线或局部等电位接地端子排，然后再连接到各类接地的共用总等电位接地端子排，再与共用接地极相连接
 - (2) 防静电工作区域的防静电接地系统必须采取防静电等电位联接，同时与其它接地系统等电位连接
 - (3) 每个防静电装备引出的防静电接地支线应单独与防静电接地干线或防静电接地汇流母线相联接，不允许串联联接
 - (4) 防静电接地连接系统宜采用裸导线（编织扁铜带、铜排），以便检查和维护，若采用带有绝缘外皮，则外皮颜色宜为黄绿双色
 - (5) 防静电地面、墙面等设置的防静电接地支线不少于两条，防静电地线与防静电装备的连接必须保证一定接触面积
 - (6) 接地各线路的相互联接可采用钎焊、锡熔焊、压力连接等牢固、可靠方式，不应简单缠绕连接，各连接点的接触电阻值小于 0.1Ω
 - (7) 腕带（在保护电阻之后的连线）接地线电阻不大于 2Ω
 - (8) ANSI/ESD S20.20规定：设备接地电阻 <math>< 1\Omega</math> (至接地极交流电阻)；辅助接地电阻 (至公共接地端电阻) <math>< 25\Omega</math>；防静电等电位接地电阻 <math>< 1 \times 10^9\Omega</math> (静电接地和设备接地点相连接)
 - (9) IEC61340-5-1规定：设备接地极和防静电接地板可共用，设备接地线的电阻应不大于 2Ω
- (1) In the common earthing system, various grounding does not allow mixing and overlapping, should be attached to the respective grounding busbar or local equipotential earthing terminal row, and then share the total equipotential connected to various grounding grounding terminals, and then connected to a common grounding electrode.
 - (2) The anti static grounding system in the anti static working area must be connected with the electrostatic potential and equipotential connection with other grounding systems.
 - (3) The anti-static grounding branch drawn by each anti-static device should be connected to the anti-static earthing main line or the anti-static grounding busbar separately, and no serial connection is permitted.
 - (4) Anti electrostatic grounding system should adopt the bare wire (copper and copper), so as to check and maintain, if used with insulation jacket, then skin color should be yellow green color.
 - (5) There are no less than two anti-static grounding branches installed on anti-static ground, wall and so on. The connection between anti-static ground wire and anti-static equipment must ensure a certain contact area.
 - (6) The connection between all the grounding lines can be made by means of soldering, tin melting and welding, pressure connection and so on. It should not be simply wound and connected. The contact resistance values of each connection point are less than 0.1Ω .
 - (7) The earthing resistance of the wristband (after the protection of the resistance) is not more than 2Ω .
 - (8) ANSI/ESD S20.20 stipulates that the grounding resistance of the device is less than 1Ω (to the AC resistance of the grounding electrode), the auxiliary grounding resistance (to the common grounding terminal resistance) is less than 25Ω , and the anti-static equipotential grounding resistance is less than $1 \times 10^9\Omega$ (electrostatic grounding and equipment location).
 - (9) IEC61340-5-1 stipulates that the grounding electrode of the equipment and the anti static grounding electrode can be shared, and the resistance of the grounding wire of the equipment should not be more than 2Ω .

整体防静电型工作台

Whole antistatic Workbench

宁楚智能科技一直致力于静电防护技术及应用的研究，隶属于江苏威利集团，专业从事防静电装备生产、销售、施工为一体的厂家，拥有上海、广东多地防静电装备产品体验展示中心。宁楚智能科技生产的防静电装备产品能让用户有效避免研发、生产过程中静电带给静电敏感器件的损伤，同时给用户带来舒适、安全、可靠的生产环境。

宁楚智能科技的防静电工作台基于国外知名公司的设计理念演变而来，并结合国内外客户现场实际需求改进，人性化设计提高工作效率，模块化设计可任意调整生产以适应各种变化的需求，静电防护技术专业化能快速为企业排难解忧。

宁楚智能科技已在国内外拥有广泛的经销商渠道，一直在为全球几十个国家和地区提供从设计到生产到施工的静电防护技术与应用一站式服务。

NEACHO intelligent technology has been committed to the research of electrostatic protection technology and application. It belongs to the Wiley group of Jiangsu. It specializes in the production, sale and construction of antistatic equipment. It has many antistatic equipment products experience exhibition centers in Shanghai and Guangdong. Ningchu intelligent technology produces anti-static equipment products, which can effectively avoid static damage caused by static electricity to users in research and production process, and at the same time, provide users with comfortable, safe and reliable production environment.

NEACHO intelligent technology anti-static table based on the design concept of a company in Finland evolved, and combined with the improvement of domestic and foreign customers actual demand, humanized design and improve work efficiency, modular design can adjust production to meet the changing needs of electrostatic protection professional production enterprises can quickly for additional grief.

NEACHO intelligent technology has been widely distributed at home and abroad, and has been providing one-stop service for design, production and construction of electrostatic protection technology and applications for dozens of countries and regions in the world.

- 防静电工作台所有部件均为长效型防静电材料制作，本身摩擦不起静电，保证防静电十年稳定性
- 所有防静电工作台独特的静电导泄路径设计，实现静电纵向泄放至大地，从根本上杜绝静电对产品带来的危害
- 所有部件标准化设计，灵活互换、自由组合，适应柔性化生产工艺要求中的各种变化，经济实用
- 防静电工作台可用于万级净化车间，适用于试验、电装、焊接、调试、钳工、包装等各项工作
- 宁楚智能科技研发、设计、生产的防静电工作台不仅实用更为美观，常被用户被誉为“实用的艺术品”
- All the components of the anti static working table are made of long-acting antistatic materials, and their friction can not afford the static electricity, and the stability of the anti static electricity is guaranteed for ten years.
- The unique electrostatic discharge path of all anti - static worktable is designed to realize static discharge to the earth and eliminate the harm to the product from the static electricity.
- All components standardized design, flexible interchangeability, free combination, adapt to the flexible production process requirements of various changes, economic and practical.
- Anti static table can be used in the 10000 level purification workshop, suitable for testing, electrical loading, welding, debugging, filter, packaging and other work.
- NEACHO intelligent technology research and development, design, production of antistatic workbench is not only practical and more beautiful, often praised by the users as " Practical Works of Art ".

标准通用型工作台

Standard general type worktable

外形尺寸 Shape size	长L Width 高H Height	750 20 390	900 20 390	1200 20 390
应用描述 Application description	可放置各类挂钩配件, 悬挂各种工具 All kinds of hook fittings can be placed and various tools can be suspended.			

显示器挂板 | Display plate

技术参数 Technical data

产品编号 Product No.	NCC38185	NCC38195	NCC38125	NCC38155
防静电性能 ESD property				1 x 10 ⁸ ~1 x 10 ⁹ Ω
颜色 Color				灰白色/蓝色 RAL7035 / RAL7058
环境温度 Ambient temperature				10~35°C
环境湿度 Ambient humidity				15~75%
外形尺寸 Shape size	长L Width 高H Height	750 20 390	900 20 390	1200 20 390
应用描述 Application description	悬挂显示器, 可实现智能电子作业指导书 Intelligent electronic instruction book can be realized by suspension display			

防静电工作台附件 ESD accessories of workbench

百叶孔上挡板 | Louvered board

技术参数 Technical data

产品编号 Product NO.	NCC38285	NCC38295	NCC38225	NCC38255
防静电性能 ESD property	$1 \times 10^8 \sim 1 \times 10^9 \Omega$			
颜色 Color	灰白色/蓝色 Gray / Blue RAL7035 / RAL7058			
环境温度 Ambient temperature	10~35°C			
环境湿度 Ambient humidity	15~75%			
外形尺寸 Shape size (mm)	长L Width 50	宽W/D Depth 900	1200	1500
	高H Height 390	390	390	390
承载能力(kg) Load capacity	30	30	20	20
应用描述 Application description	作为工艺着板使用，可张贴各类作业指导书 As a craft board, all kinds of instruction books can be posted			

轻量型悬挂架 | Light weight hanger

技术参数 Technical data

产品型号 Product model	NCC48075	NCC48090	NCC48020	NCC48050
防静电性能 ESD property	$1 \times 10^8 \sim 1 \times 10^9 \Omega$			
颜色 Color	灰白色/蓝色 Gray / Blue RAL7035 / RAL7058			
环境温度 Ambient temperature	10~35°C			
环境湿度 Ambient humidity	15~75%			
外形尺寸 Shape size (mm)	长L Width 50	宽W/D Depth 900	1200	1500
	高H Height 150	150	150	150
承载能力(kg) Load capacity	30	30	20	20
应用描述 Application description	用于悬吊物料盒 Suspension material box			

防静电注塑料盒 | Anti static injection plastic box

技术参数 Technical data

产品编号 Product NO.	NCZ18121	NCZ18122	NCZ18123
防静电性能 ESD property	< $1 \times 10^8 \Omega$		
颜色 Color	黑色 Black		
环境温度 Ambient temperature	10~35°C		
环境湿度 Ambient humidity	15~75%		
外形尺寸 Shape size (mm)	长L Width 100	135	157
	宽W/D Depth 160	200	235
	高H Height 70	90	122
应用描述 Application description	存放电子元器件、螺丝紧固件等 Store electronic components, screw fasteners, etc.		

承重型悬挂架 | Heavy weight hanger

技术参数 Technical data

产品型号 Product model	NCC48175	NCC48190	NCC48120	NCC48150
防静电性能 ESD property	$1 \times 10^8 \sim 1 \times 10^9 \Omega$			
颜色 Color	灰白色/蓝色 Gray / Blue RAL7035 / RAL7058			
环境温度 Ambient temperature	10~35°C			
环境湿度 Ambient humidity	15~75%			
外形尺寸 Shape size (mm)	长L Width 50	宽W/D Depth 900	1200	1500
	高H Height 150	150	150	150
承载能力(kg) Load capacity	50	50	30	30
应用描述 Application description	用于悬吊物料盒 Suspension material box			

防静电工作台附件 ESD accessories of workbench

铜制搁板 | Steel shelf

技术参数 Technical data

产品编号 Product NO.	NCC18753	NCC18953	NCC18123	NCC18755	NCC18955	NCC18125
防静电性能 ESD property	$1 \times 10^8 \sim 1 \times 10^9 \Omega$					
颜色 Color	灰白色/蓝色 Gray / Blue RAL7035 / RAL7058					
环境温度 Ambient temperature	10~35°C					
环境湿度 Ambient humidity	15~75%					
外形尺寸 Shape size (mm)	长L Width 50	宽W/D Depth 900	1200	750	900	1200
	高H Height 300	300	300	400	400	400
承载能力(kg) Load capacity	50	50	30	50	50	30
应用描述 Application description	用于放置资料、仪器、工具等物品，可倾斜20度安装 Used for placing materials, instruments, tools, etc. Can tilt 20° to install					

间隔板 | Divider plate

技术参数 Technical data

产品型号 Product model	NCC20030	NCC21040	
防静电性能 ESD property	$1 \times 10^8 \sim 1 \times 10^9 \Omega$		
颜色 Color	灰白色/蓝色 Gray / Blue RAL7035 / RAL7058		
环境温度 Ambient temperature	10~35°C		
环境湿度 Ambient humidity	15~75%		
外形尺寸 Shape size (mm)	长L Width 80 300	80 400	
	高H Height 200	200	
应用描述 Application description	放置在钢制搁板或木制搁板上，用于文档资料分类 Place on a steel shelf or wooden shelf for classification of document data		

可调节钢制搁板 | Adjustable steel shelf

技术参数 Technical data

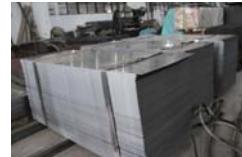

产品型号 Product model	NCC60187	NCC60197	NCC60287	NCC60297
防静电性能 ESD property	$1 \times 10^8 \sim 1 \times 10^9 \Omega$			
颜色 Color	灰白色/蓝色 Gray / Blue RAL7035 / RAL7058			
环境温度 Ambient temperature	10~35°C			
环境湿度 Ambient humidity	15~75%			
外形尺寸 Shape size (mm)	长L Width 750 650	900 650	750 650	900 650
	高H Height 35	35	35	35
承载能力(kg) Load capacity	100	100	150	150
应用描述 Application description	用于放置资料、仪器、工具等物品，可倾斜0~25度安装 Used for placing materials, instruments, tools, etc. Can tilt 0~25° installation			

防静电钢制品生产过程与工艺**Production process and technology of anti static steel products****优质原材料备料**

High quality preparation of raw materials

低碳钢型材
Low carbon steel section bar

冷轧钢板
Cold rolled steel plate

优质冷轧钢卷材
Cold rolled steel rolling material

钣金产品毛坯件加工

Processing of blank parts for sheet metal products

数控冲压加工中心
NC stamping Center

数控激光加工中心
NC laser machining center

大型模具冲压加工中心
Large mold stamping Center

数控折弯加工中心
NC bending machining center

数控折弯加工中心
NC bending machining center

点焊加工中心
Spot welding machining center

氩弧焊
Argon arc welding

氩弧焊
Argon arc welding

表面抛光打磨
Surface polishing and grinding

钣金产品毛坯件

Blank parts of sheet metal products

**钣金产品表面涂装**

Surface coating of sheet metal products

钢制品包装
Packaging of steel products

钢制品表面颜色
Surface color of steel products

浅灰色 Light Grey
RAL7035

浅蓝色 Light Blue
RAL7008

**所有宁楚生产的钢制品
即可拥有三年质量保障**

电动升降工作台 Motorized workbench

组合编号 | Combination NO. NCA02301

工作台支撑 | Workbench support

技术参数 Technical data

产品编号 Product NO.	NCA06120	NCA08120	NCA09120	NCA06153	NCA08153	NCA09153	NCA06183	NCA08183	NCA09183
产品型号 Product model	1200 x 600	1200 x 750	1200 x 900	1530 x 600	1530 x 750	1530 x 900	1830 x 600	1830 x 750	1830 x 900
防静电性能 ESD property									
承载能力 Load capacity									
环境温度 Ambient temperature									
环境湿度 Ambient humidity									
长L Shape size (mm)	1200 600 670-1120	1200 750 670-1120	1200 900 670-1120	1530 600 670-1120	1530 750 670-1120	1530 900 670-1120	1830 600 670-1120	1830 750 670-1120	1830 900 670-1120
应用描述 Application description	选配全进口升降马达，数字化实时显示高度，具有记忆键设置功能，可快速将工作台调整到自定义高度 Select full import motor, digital real-time display height, with memory key setting function, can quickly adjust the worktable to the custom height								

- 按住向上箭头按钮，工作台自动升高，松开按钮工作台停止升高
- 按住向下箭头按钮，工作台自动下降，松开按钮工作台停止下降
- 工作台升降到合适位置，按下“M”按钮再按数字按钮（1或2或3或4）存储自定义高度
- 为延长马达使用寿命，在按向上或向下箭头按钮时请不要超过3分钟
- Press up the up arrow button, the workbench automatically rises, the release button stops up
- Press down the down arrow button, the workbench automatically drops, the release button stops down
- The worktable is lifted to the right position, and press the "M" button and then press the digital button (1 or 2 or 3 or 4) to store the custom height
- In order to prolong the service life of the motor, do not exceed 3 minutes when pressing the up or down arrow buttons.

活页文件夹支架 | Loose-leaf folder

技术参数 Technical data

产品编号 Product No.	NCC50206
托盘尺寸 Tray size	240 x 330mm
均匀承重 Uniform load	10kg
描述 Description	标配活页文件夹10片, 大角度旋转 Telescopic swaying, Large angle rotation, optional keyboard pallet

塑料料盒托架 | Plastic box bracket

技术参数 Technical data

产品编号 Product No.	NCC54621
托盘尺寸 Tray size	550 x 185 x 125mm
均匀承重 Uniform load	15kg
描述 Description	用于放置塑料盒, 大角度旋转 It is used for placing plastic box, which can be rotated in a large angle.

侧挂式主机托架 | Side mounted host computer stand

技术参数 Technical data

产品编号 Product No.	NCC80055
托盘尺寸 Tray size	(180~225) x 400 x 50mm
均匀承重 Uniform load	30kg
描述 Description	宽度范围内任意调节 Arbitrary adjustment within the width range

落地式主机托架 | Landing host computer stand

技术参数 Technical data

产品编号 Product No.	NCC57053
托盘尺寸 Tray size	(130~210) x 400 x 120mm
均匀承重 Uniform load	50kg
描述 Description	可配脚轮, 宽度范围内任意调节 Optional matching casters, within the width of arbitrary adjustment.

防静电脚踏 | Antistatic foot tread

技术参数 Technical data

产品编号 Product No.	NCC83535
托盘尺寸 Tray size	600 x 400 x 390mm
均匀承重 Uniform load	50kg
描述 Description	可任意调节角度、高度 The angle and height can be adjusted arbitrarily

斜面钢制电源线盒 Slant steel socket box

- 以用户实际应用为主导，独具特色的设计理念，斜面钢制电源线盒可拆卸式盖板设计，使得维护或拆换对应制式的电源器件更为灵活便利
- 主要配合380V、220V、110V等交流电源使用，也可以配合所需的直流电源使用
- 可选配各类控制开关器件、国际常用电源插座（国标、欧标、美标、英标、意标等）、航空插座、漏电保护器、交直流器件等
- 根据需要还可以选配各类气动组件、气体管路连接、气压表、气接头等
- 总电路控制实现各产线总线合理布局、分路控制，有效分配用电负载，保障生产用电安全
- Taking the user practical application as the leading and unique design concept, the design of the detachable cover plate of the inclined steel power line box makes the maintenance or replacement of the corresponding power supply device more flexible and convenient.
- It is mainly used with 380V, 220V, 110V and other AC power supply, and it can also be used with the required DC power supply. Can be equipped with various types of control switch and power socket (international common standard, European standard, British standard, mark American Standard, etc.), aviation socket, leakage protection, DC device etc.
- All kinds of pneumatic components, gas pipeline connection, barometer, gas connection head and so on can be selected according to the needs.
- The total circuit control realizes the rational distribution and dividing control of each line bus, effectively distributes the electric load, and ensures the safety of production.

照明灯斜撑支架 Light support bracket

- 国际主流外形设计，高承重性结构
- 双向设计，可前后任意调节位置以适应使用的需要，也可在滑轨上横向任意调节相应位置
- 配置C形滑轨，便于悬挂平衡器配合电动工具或气动工具的使用，也可选配照明灯具增加照明
- International mainstream design, high load-bearing structure.
- Two-way design, can adjust the position of front and back to meet the needs of use, and also can adjust the corresponding position arbitrarily on the slide rail.
- C shaped slide rail is configured to facilitate the use of suspension balancer with electric tools or pneumatic tools, and also to choose lighting fixtures to increase lighting.

环保型钢制LED照明灯 Steel shell LED light lamp

- 钢制金属外壳，散热极好，合理的结构设计，高档美观
- 选用高品质、高亮度的双排LED光源，无眩光、无闪烁，均匀发光
- 采用恒流驱动可更有效提升使用寿命，大限度的降低能耗，绿色环保
- 宽电压输入：AC 85V~275V，在相同照度下，相比传统日光灯，省电效能高达62%
- Steel metal shell, excellent heat dissipation, reasonable structure design, high quality and beautiful.
- With high quality, high brightness, double row LED light source, no glare, no scintillation, uniform luminescence.
- The use of constant current drive can improve the service life more effectively, reduce energy consumption to a large extent, and green environmental protection.
- Wide voltage input: AC 85V~275V, under the same illumination, compared with traditional fluorescent lamp, the power saving efficiency is up to 62%.

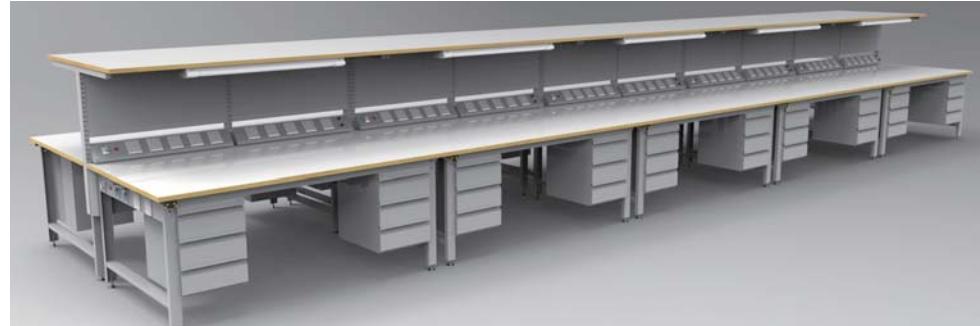

技术参数 Technical data

量身定制防静电工作台**Custom-made anti-static workbench**

- 拥有强大的工业设计、结构设计专业技术团队
- 依据实际需求，定制化设计，为您量身定制，设计方案可行性高
- 选用长效稳定性的防静电材料制作，防静电性能： $1 \times 10^6 \sim 1 \times 10^8 \Omega$
- 极力实现艺术与实用最恰当的结合，成就符合企业独特设计理念的防静电工作台
- We have a strong technical team of industrial design and structural design.
- According to the actual needs, customized design, customized for you, the design scheme is highly feasible.
- We have selected long-acting and stable antistatic materials. Antistatic performance: $1 \times 10^6 \sim 1 \times 10^8 \Omega$
- The most appropriate combination of art and practicality is achieved, and the anti static workbench which meets the unique design concept of the enterprise is achieved.

**量身定制防静电工作台****Custom-made anti-static workbench**

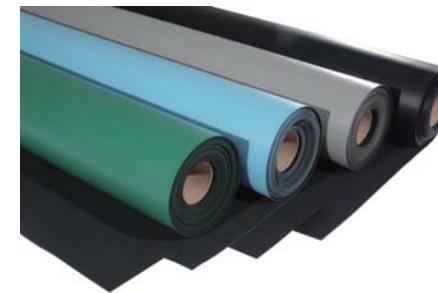

防静电环保无油无味型台垫**Anti - static and environment-friendly, tasteless and tasteless mats**

- 选用优质环保丁晴橡胶为主要原料，添加优质导电填料，自主配制而成的防静电环保无油无味台垫，充分融合，各成分分布非常均匀
- 正面静电耗散层： $1 \times 10^5 \Omega \sim 1 \times 10^9 \Omega$ ；反面静电导电层： $< 1 \times 10^5 \Omega$ ，静电泄放时间 $< 1.9s$ ，防静电性能稳定性持续2~3年
- 具有耐磨、耐酸碱、高弹性、抗老化、防辐射、防震、抗疲劳等功能
- 表面无明显散光或反光，有效缓解视觉疲劳
- The antistatic, environment-friendly, oil-free and tasteless cushion made of high quality environmental friendly Ding Qing rubber as main raw material and high quality conductive filler is fully integrated, and the distribution of each component is very uniform.
- The positive electrostatic dissipative layer: $1 \times 10^5 \Omega \sim 1 \times 10^9 \Omega$, the reverse electrostatic conductive layer: $< 1 \times 10^5 \Omega$, the electrostatic discharge time $< 1.9s$, the stability of antistatic property for 2~3 years.
- It has the functions of wear-resisting, acid and alkali resistance, high elasticity, anti aging, radiation proof, shock proof and anti fatigue.
- There is no apparent astigmatism or reflection on the surface, which can effectively relieve visual fatigue.

**防静电1:1实心台垫 | Anti-static 1:1 solid mats**

防静电高级纺织面工作椅

Antistatic high-end textile face chair

- 符合人体工程学原理，散热透气，质感舒适，高档美观
- 整体防静电，结构采用静电安全释放路径设计，防静电性能： $< 1 \times 10^9 \Omega$
- 工作椅坚固耐用，椅背拉力强度测试为：70~110kg
- According to the principle of ergonomics, heat dissipation, ventilation, comfortable quality, high quality beauty
- Overall static electricity, the structure adopts the electrostatic safety release path design, antistatic performance: $1 \times 10^5 \sim 1 \times 10^9 \Omega$
- Strong and durable work chair, tensile strength test of back seat: 70~110kg

防静电聚氨酯发泡工作椅 Antistatic PU foam chair

- 符合人体工程学原理，软硬适中，质感舒适，高档美观
- 整体防静电，结构采用静电安全释放路径设计，防静电性能： $< 1 \times 10^9 \Omega$
- 工作椅坚固耐用，椅背拉力强度测试为：70~110kg
- According to the principle of ergonomics, heat dissipation, ventilation, comfortable quality, high quality beauty
- Overall static electricity, the structure adopts the electrostatic safety release path design, antistatic performance: $1 \times 10^5 \sim 1 \times 10^9 \Omega$
- Strong and durable work chair, tensile strength test of back seat: 70~110kg

金属镀铬线网架 Chrome wire mesh shelf

- 由钢丝网焊接而成，表面镀铬
- 加强型结构设计，满足各类工具、物料的存放
- 自由调整层数和层高，每层载重30kg
- It is made of steel wire mesh, and the surface is chrome plated.
- Strengthen the design of the structure to meet the storage of all kinds of tools and materials.
- The number and height of the layer are adjusted freely, and the weight of each layer is 30kg.

线网推车 | Wire mesh trolley

产品编号 Product NO.	NC06501
产品尺寸 Product size	900L × 450D × 1050H
描述 Description	三层搁板、导电轮 Three layer shelf, conductive wheel

线网架 | Wire mesh shelf

产品编号 Product NO.	NC06503
产品尺寸 Product size	900L × 450D × 900H
描述 Description	三层搁板 Three layer shelf

线网推车 | Wire mesh trolley

产品编号 Product NO.	NC06504
产品尺寸 Product size	900L × 450D × 1050H
描述 Description	三层搁板、导电轮 Three layer shelf, conductive wheel

线网推车 | Wire mesh trolley

产品编号 Product NO.	NC06502
产品尺寸 Product size	900L × 450D × 1600H
描述 Description	单波峰搁板、双波峰搁板 Single and double wave shelf

线网推车 | Wire mesh trolley

产品编号 Product NO.	NC06505
产品尺寸 Product size	900L × 450D × 1600H
描述 Description	单波峰搁板、双波峰搁板 Single and double wave shelf

防静电推车 Antistatic trolley

防静电仪器推车
Antistatic instrument trolley

产品编号 Product NO.	NC06601
产品尺寸 Product size	750L × 600D × (770-1220)H
描述 Description	防静电台面、导电脚轮 Antistatic table-top and conductive casters

防静电轻型推车
Antistatic light trolley

产品编号 Product NO.	NC06602
产品尺寸 Product size	650L × 450D × 750H
描述 Description	三层搁板、导电脚轮 Three layer shelf and conductive casters

防静电不锈钢推车
Antistatic stainless steel trolley

产品编号 Product NO.	NC06603
产品尺寸 Product size	850L × 450D × 900H
描述 Description	三层搁板、导电脚轮 Three layer shelf and conductive casters

防静电工业推车
Antistatic instrument trolley

产品编号 Product NO.	NC06604
产品尺寸 Product size	780L × 600D × 800H
描述 Description	防静电台面、导电脚轮 Antistatic surface and conductive casters

防静电工业推车
Antistatic instrument trolley

产品编号 Product NO.	NC06605
产品尺寸 Product size	780L × 600D × 800H
描述 Description	防静电台面、导电脚轮 Antistatic surface and conductive casters

防静电支架推车
Antistatic instrument trolley

产品编号 Product NO.	NC06605
产品尺寸 Product size	840L × 700D × 720H
描述 Description	防静电台面、导电脚轮 Antistatic surface and conductive casters

防静电储物柜**Antistatic storage cabinet**

- 选用0.8mm厚度的优质冷轧钢板加工制作而成，结构稳固结实
- 均可根据实际需求定制整体式或分体式
- 采用防静电烤漆工艺，整体防静电稳定十年，防静电性能： $1 \times 10^5 \sim 1 \times 10^9 \Omega$
- 用于存放电子元器件、半成品、辅料、零件、医疗器材等
- It is made of high quality cold rolled steel plate with 0.8mm thickness, and its structure is stable and strong.
- Can customize the integral or split type according to the actual demand.
- Antistatic coating process with antistatic stability for ten years, anti static performance: $1 \times 10^5 \sim 1 \times 10^9 \Omega$.
- Used for storage of electronic components, semi-finished products, accessories, parts, medical equipment, etc.

双开玻璃门储物柜
Double glass door cabinet

Product No. NC06701

产品尺寸 Product size

900L x 400D x 1800H

描述 Description

带四层搁板, 每层承重20kg

双开门储物柜
Double door cabinet

Product No. NC06702

产品尺寸 Product size

900L x 400D x 1800H

描述 Description

带四层搁板, 每层承重20kg

上玻璃双开门储物柜
Double door cabinet

Product No. NC06703

产品尺寸 Product size

900L x 400D x 1800H

描述 Description

带两层搁板, 每层承重20kg

上玻璃双开门储物柜
Double open door cabinet

Product No. NC06704

产品尺寸 Product size

900L x 400D x 1800H

描述 Description

带一层搁板, 每层承重20kg

上玻璃门双抽储物柜
Double glass door double drawer cabinet

Product No. NC06705

产品尺寸 Product size

900L x 400D x 1800H

描述 Description

带一层搁板, 每层承重20kg
One shelf, weight per layer: 20kg双开玻璃门五抽储物柜
Double glass door five drawer cabinet

Product No. NC06706

产品尺寸 Product size

900L x 400D x 1800H

描述 Description

带一层搁板, 每层承重20kg
One shelf, weight per layer: 20kg上下门双抽储物柜
Upper & lower door double drawer cabinet

Product No. NC06707

产品尺寸 Product size

900L x 400D x 1800H

描述 Description

带一层搁板, 每层承重20kg
One shelf, weight per layer: 20kg六门衣柜
Six door locker

Product No. NC06708

产品尺寸 Product size

900L x 500D x 1800H

描述 Description

带一层搁板, 每层承重20kg
One shelf, weight per layer: 20kg**防静电储物柜 (2017新款)****Antistatic storage cabinet (new 2017)**

- 零部件均采用模具加工制作，样式新颖，高档美观
- 采用防静电烤漆工艺，整体防静电稳定十年，防静电性能： $1 \times 10^5 \sim 1 \times 10^9 \Omega$
- 用于存放电子元器件、半成品、辅料、零件、医疗器材等
- All parts are made of mould, new style and high quality
- Antistatic coating process with antistatic stability for ten years, anti static performance: $1 \times 10^5 \sim 1 \times 10^9 \Omega$.
- Used for storage of electronic components, semi-finished products, accessories, parts, medical equipment, etc.

防静电加强型整理柜

Antistatic strengthening type cabinet

- 整体防静电，防静电性能： $< 1 \times 10^8 \Omega$
- 加强型结构设计，满足各类工具、物料的存放
- 标准化设计，搁板、门板、背板均为选配件，不同搭配组合
- Overall static electricity, antistatic performance: $< 1 \times 10^8 \Omega$
- Strengthen the design of the structure to meet the storage of all kinds of tools and materials
- Standardized design, shelf, door plate, backboard are all selected parts, different combinations of combinations

物料盒整理柜
Material box cabinet

产品编号 Product No.	NC06901
产品尺寸 Product size	1050L × 500D × 1800H
描述 Description	标配大号物料盒70个 Large material boxes 70

抽拉料盒整理柜
Pull-out box finishing cabinet

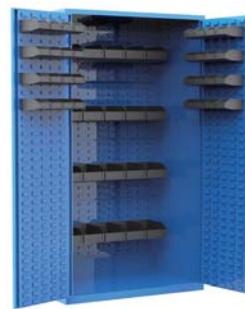

产品编号 Product No.	NC06902
产品尺寸 Product size	1050L × 500D × 1800H
描述 Description	标配抽拉料盒80个 Pull-out boxes 80

双开门整理柜
Double door cabinet

产品编号 Product No.	NC06903
产品尺寸 Product size	1050L × 500D × 1800H
描述 Description	标配大号物料盒70个 Large material boxes 70

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC06906
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配方孔板、搁板 Formula hole plate, shelf

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC06907
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配方孔板、百叶板 Formula hole plate, blinds

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC06908
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配百叶板、方孔板 Blinds, formula hole plate

防静电加强型整理柜

Antistatic strengthening type cabinet

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC07001
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配搁板 Shelf

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC07002
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配搁板、抽屉 Shelf, drawer

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC07003
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配搁板、抽屉 Shelf, drawer

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC07006
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配搁板、抽屉、单门 Shelf, drawer, single door

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC07007
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配搁板、方孔板 Shelf, formula hole plate

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC07008
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	玻璃门、标配搁板 Glass door, shelf

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC07010
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配方孔板、百叶板、抽屉 Formula hole plate, blinds, drawer

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC07011
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配搁板、抽屉 Shelf, drawer

加强型整理柜
Strengthening type cabinet

产品编号 Product No.	NC07012
产品尺寸 Product size	1000L × 600D × 1800H
描述 Description	标配搁板、抽屉 Shelf, drawer

防静电电流条货架 Antistatic flow rack

- 选用优质冷轧钢通过冷弯成型工艺制作，结构简单，节约空间，外形美观
- 货架立柱与横梁采用插接组合方式，每层承重300kg，靠自重锁紧，安装拆卸简单方便
- 表面防静电烤漆，本身摩擦不起电，能安全有效缓解静电释放过程，防静电性能： $< 1 \times 10^9 \Omega$
- 立柱与横梁材料厚度均为1.5mm，流利条选用优质铝合金支架导电滚轮，滑动自如，满足产线物料先进先出提高效率的需求
- High quality cold rolling steel is made by cold bending process. It has simple structure, space saving and beautiful appearance.**
- The shelf column and beam are connected and combined, each layer weighs 300kg, and is locked by self weight. It is simple and convenient to install and dismantle.
- The surface antistatic paint, which does not wear electricity, can safely and effectively relieve the electrostatic release process, antistatic performance: $< 1 \times 10^9 \Omega$
- The thickness of column and crossbeam material is 1.5mm, and the fluency bar is made of high quality aluminum alloy bracket and conductive roller, which can slide freely and meet the needs of first line, first out and efficiency improvement of production line.

防静电柔性化传输单元 Antistatic attic stereoscopic rack

- 模块化设计，适应不同生产需求，任意调整传输路径和方式
- 低成本运行，低成本改造，灵活易动，优化生产，满足各种产品级零部件组装生产
- 可以配置独立的照明系统，独立静电防护管控系统，线路插接方便，维护简单
- 表面防静电烤漆，本身摩擦不起电，能安全有效缓解静电释放过程，防静电性能： $< 1 \times 10^9 \Omega$
- 广泛应用于微电子组装、移动终端设备装配等，根据现场实际需求独立设计，充分利用场地，提升工作效率
- Modular design adapts to different production requirements and adjusts the transmission path and mode arbitrarily.
- Low cost, low cost optimization transformation, flexible production, easy to move, to meet a variety of product assembly production.
- It can be equipped with independent lighting system, independent electrostatic protection and control system, easy to connect line and simple maintenance.
- The surface antistatic paint, which does not wear electricity, can safely and effectively relieve the electrostatic release process, antistatic performance: $< 1 \times 10^9 \Omega$
- It is widely used in microelectronic assembly, assembly of mobile terminal equipment and so on. It is designed independently according to the actual needs of the field, making full use of the site and improving the efficiency of work.

防静电仓储货架 Antistatic storage rack

- 选用优质冷轧钢通过冷弯成型工艺制作，结构简单，外形美观
- 货架立柱与横梁采用插接组合方式，靠自重锁紧，安装拆卸简单方便
- 表面防静电烤漆，本身摩擦不起电，能安全有效缓解静电释放过程，防静电性能： $< 1 \times 10^9 \Omega$
- 立柱与横梁材料厚度均为1.5mm，钢制层板材料厚度均为0.8mm，层板也可选用整体防静电搁板
- High quality cold rolling steel is made by cold bending process. The structure is simple and the shape is beautiful.
- The shelf column and the cross beam are connected and combined by the way of self weight locking, and the installation and disassembly are simple and convenient.
- The surface antistatic paint, which does not wear electricity, can safely and effectively relieve the electrostatic release process, antistatic performance: $< 1 \times 10^9 \Omega$
- The thickness of the material of the column and the beam is 1.5mm, the thickness of the steel laminates is 0.8mm, and the laminates can also be used as a whole antistatic shelf.

防静电阁楼立体货架 Antistatic attic stereoscopic rack

- 阁楼立体货架以货架为主结构体，配合楼面板及楼板梁构成平台或多楼层货架组合
- 采用互扣的连接方式，确保楼面板与楼板梁之间锁定，具有精度高、表面平整、承载能力强等优势
- 可以配置独立的照明系统，提升下层楼面亮度，方便货物存取管理
- 人性化设计，楼层间距通常为2.2m~2.7m，充分考虑人机操作的便利性，顶层货架高度一般为2.5m左右
- 表面防静电烤漆，本身摩擦不起电，能安全有效缓解静电释放过程，防静电性能： $< 1 \times 10^9 \Omega$
- 广泛应用于汽车、电子、微电子、轻工等领域，根据现场实际需求独立设计，充分利用场地，提升仓储空间
- The attic stereoscopic shelf is based on the shelf – based structure, which is combined with the floor slab and floor beam to form a platform or multi storey shelf.
- The interlocking method ensures the lock between the floor slab and the slab beam, and has the advantages of high precision, smooth surface and strong bearing capacity.
- An independent lighting system can be configured to enhance the brightness of the lower floor and facilitate the access and management of the goods.
- Humanized design, the floor space is usually 2.2m~2.7m, fully consider the convenience of man-machine operation, the top shelf height is generally about 2.5m.
- The surface antistatic paint, which does not wear electricity, can safely and effectively relieve the electrostatic release process, antistatic performance: $< 1 \times 10^9 \Omega$
- It is widely used in automotive, electronic, microelectronics, light industry and other fields, according to the actual needs of the site design, full use of the site to improve storage space.

防静电注塑周转箱 Anti static injection turnover box

- 以聚丙烯 (PP) 为基材, 添加自主研发的改性导电塑料辅材, 保留原有较强的机械性能的同时提升材料的静电导泄性能
- 摩擦不起静电, 能安全有效缓解静电释放过程, 防静电性能: $< 1 \times 10^9 \Omega$
- 产品具有坚韧耐磨、防潮防腐、隔热等作用, 大量用于生产过程中电子器件的周转、包装和运输
- PP as the substrate, conductive plastic material to add the independent research and development, to retain the original mechanical performance of strong and improve material performance static discharge.
- It is safe and effective to relieve the static release of static electricity, antistatic performance: $< 1 \times 10^9 \Omega$
- The products have the functions of tough, wear-resistant, moistureproof and antisepic, heat insulation and so on. It is widely used in the turnover, packaging and transportation of electronic devices in the process of production.

防静电中空板周转箱 Antistatic hollow board turnover box

- 可任意裁切制作各种尺寸需求的周转箱
- 具有质轻、坚韧、经济等特点, 板材厚度: 2mm、3mm、4mm、5mm、6mm
- 防静电性能: $< 1 \times 10^9 \Omega$
- A turnaround box for various sizes can be made at any cut.
- With the characteristics of light quality, tough, economic and so on, plate thickness: 2mm, 3mm, 4mm, 5mm, 6mm
- Antistatic performance: $< 1 \times 10^9 \Omega$

防静电SMT上下料架 Antistatic SMT rack

- 标准料架的耐热温度85°C, 基准位置 (A=34mm, B=34mm)
- 侧面导向槽, 槽深3.5mm, 槽宽5mm, 槽间距10mm
- 防静电性能: $< 1 \times 10^9 \Omega$
- Metal plate is selected for the bottom plate. The heat resistance temperature is 85 °C, the reference position (A=34mm, B=34mm)
- Side direction groove, groove depth 3.5mm, slot width 5mm, slot spacing 10mm
- Antistatic performance: $< 1 \times 10^9 \Omega$

静电防护用品 Electrostatic protective equipment

- 在静电防护区域里，人员是极为重要的静电源，随着人员不停的活动，各种摩擦产生大量的静电需要安全释放
- 接触静电敏感器件之前，人员必须先消除静电或者确保自身接地可靠、安全
- 根据静电防护区域环境的不同，选着不同的防静电衣帽和鞋子，特定岗位还需穿戴防静电手套
- In the electrostatic protection area, the personnel are the most important static power. With the continuous activity of the personnel, a large amount of static electricity needs to be released safely.
- Before the electrostatic sensitive device is touched, the personnel must first remove the static electricity or ensure that their grounding is reliable and safe.
- According to the different electrostatic protection area environment, choose different anti static clothes hat and shoes, special posts need to wear antistatic gloves.

通体防静电陶瓷砖地板 Anti-static ceramic tile floor

- 通体防静电陶瓷砖是一种新型的防静电产品，具有长效防静电、不发尘、防火（A级）、防滑、耐磨、耐腐、抗污能力强等特点
- 采用高科技复合技术，将导电性成分与陶瓷相结合，在陶瓷中形成连续的静电释放通道
- 其美观耐用，是一种具有高档艺术装饰效果的功能性陶瓷地板
- 将防静电陶瓷地板与配套研发的导电水泥砂浆、交叉接地铜箔、接地连接等工艺方法铺贴在平整地面上，构建成完整的地面静电防护系统
- 广泛应用于电子生产、航天航空、石油化工、医院、医药、生物等领域
- Anti static ceramic tile is a new type of antistatic product. It has the characteristics of long-acting antistatic, no dust, fire protection (Grade A), anti slip, abrasion resistance, corrosion resistance and strong antifouling ability.**
- A high tech composite technology is used to combine the conductive components with the ceramics to form a continuous electrostatic release channel in the ceramics.**
- Its beautiful and durable, a functional ceramic floor with high artistic decoration effect**
- The anti-static ceramic floor and the developed conductive cement mortar, cross grounding copper foil, grounding connection and other process methods are paved on the leveled ground to form a complete surface electrostatic protection system.**
- It is widely used in the fields of electronic production, aerospace, petrochemical, hospital, medicine, biology and other fields.**

施工要求 Construction requirements

现场温度都不低于15℃，基础地面清洁、无起砂、平整，预留防静电接地装置

The temperature of the field is not less than 15 C, the ground floor is clean, the sand is free, and the anti static grounding device is reserved.

施工工艺 Construction technology

清扫地面 — 铺设水泥砂浆 — 铺设导电水泥混合砂浆 — 铺设导电铜箔 — 铺贴通体防静电陶瓷砖地板 — 不发尘水泥勾缝

— 表面清洁 — 检测性能

Sweep the ground — Laying cement mortar — Laying of conductive cement mixed mortar — Laying conductive copper foil

— Paving anti static ceramic tile floor — No dust cement pointing — Surface cleanliness — Detection performance

防静电直铺地板 Anti-static direct laying floor

- 防静电直铺地板分为防静电PVC地板和防静电橡胶地板，均具有极好的耐磨、防水和防化学反应特性
- 导电材料均匀分布于整块地板，具有良好的防静电性能(静电导泄型 $1 \times 10^4\sim 1 \times 10^6 \Omega$ ；静电耗散型 $1 \times 10^6\sim 1 \times 10^9 \Omega$)，静电耗散能力强
- 材料通体一致，美观实用，颜色持久稳定，防火阻燃性能好
- 片材规格：600 × 600 × 2mm、600 × 600 × 3mm；卷材规格：1.2m × 10m × 2mm、1.2m × 10m × 3mm
- 广泛应用于电子生产、航天航空、石油化工、医院、医药、生物等领域
- Anti static PVC floor is divided into antistatic floor and antistatic rubber floor, which have excellent wear resistance, waterproof and chemical resistance.
- The conductive material is evenly distributed on the whole floor, and has good antistatic performance. The electrostatic conduction and drain type is $1 \times 10^4\sim 1 \times 10^6 \Omega$, and the static dissipation is $1 \times 10^6\sim 1 \times 10^9 \Omega$, which has strong static dissipation capacity.
- The materials are consistent in body, beautiful and practical, durable and stable in color, and good in fireproof and flame retardancy.
- Sheet specifications: 600 × 600 × 2mm, 600 × 600 × 3mm, rolling material specifications: 1.2m × 10m × 2mm, 1.2m × 10m × 3mm
- It is widely used in the fields of electronic production, aerospace, petrochemical, hospital, medicine, biology and other fields.

防静电架空地板

Anti-static overhead floor

- 防静电架空地板的基材有钢基、铝基、复合基、刨花板基（木基）、硫酸钙基等
- 防静电架空地板的贴面材料有防静电瓷砖、三聚氰胺板（HPL）、PVC板等
- 导电材料均匀分布于整块地板，具有良好的防静电性能(静电导泄型 $1 \times 10^4\sim 1 \times 10^6 \Omega$ ；静电耗散型 $1 \times 10^6\sim 1 \times 10^9 \Omega$)，静电耗散能力强
- 美观实用，高承载（均布载荷1600kg/平方米以上），防火阻燃性能好，地板规格：600 × 600 × 30mm
- 广泛应用于电子生产、航天航空、石油化工、医院、医药、生物等领域
- The base material of anti static overhead floor has steel base, aluminum base, composite base, particleboard base (wood base), calcium sulfate and so on
- Anti static floor surface materials have anti static ceramic tiles, melamine board (HPL), PVC board and so on
- The conductive material is evenly distributed on the whole floor, and has good antistatic performance. The electrostatic conduction and drain type is $1 \times 10^4\sim 1 \times 10^6 \Omega$, and the static dissipation is $1 \times 10^6\sim 1 \times 10^9 \Omega$, which has strong static dissipation capacity.
- Beautiful and practical, high load (more than 1600kg/ square meters load), good fire retardant and flame retardancy, floor size: 600 × 600 × 30mm
- It is widely used in the fields of electronic production, aerospace, petrochemical, hospital, medicine, biology and other fields.

焊锡烟雾净化器

Solder smog purifier

- 全新进风分流式设计让有害颗粒物和有害气体能更充分更均衡的接触HEPA和活性碳滤材，让滤芯有效吸收
- 多重过滤，空气室内循环，快速净化，300纳米污染物净化率99.99%
- 选用进口电机，降噪结构设计，最高档位开启也仅有52分贝，让我们的工作环境净中有静
- 初、中、高效滤芯可独立更换，最大限度利用滤芯，降低使用成本
- 万向吸烟臂可任意调整方位，适用于手工焊锡、机器人自动焊锡、小型锡炉、激光打标等易产生烟雾的工艺
- The new inlet design allows the harmful particles and harmful gases to be more fully and more balanced to contact HEPA and active carbon filter, so that the filter core can be absorbed effectively.
- Multiple filtration, indoor air circulation, rapid purification, 300 nanoscale pollutants purification rate 99.99%
- Selection of imported motor, noise reduction structure design, the most upscale position is only 52 decibels, let our working environment have a quiet net
- The initial, middle and high efficiency filter core can be replaced independently, the maximum use of filter core, reduce the cost of use
- The universal arm can adjust the range of smoking, suitable for manual welding, automatic soldering robot, small tin furnace, such as laser marking process is easy to produce smoke.

技术参数 Technical data

产品编号 Product NO.	NCW08301	NCW08302
额定电压 Rated voltage	110/220V	110/220V
单口风速 Wind speed	17m/s	11m/s
管臂内径 Internal diameter	75mm	75mm
空气质量 Air flow	235m³/h	235m³/h
负压 Negative pressure	2000Pa	2200Pa
外形尺寸 Shape size	长L 250 宽W/D 410 高H 410	长L 425 宽W/D 250 高H 410

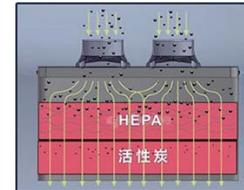

产品编号 | Product NO. NCW08301

产品编号 | Product NO. NCW08302

滤芯说明 Filter cartridge

产品编号 Product NO.	产品名称 Product name	功能描述 Functional description	使用周期 Lifetime
NCW08301	初效过滤棉 First effect filter cotton	加厚纤维材质，吸附大颗粒物 Thickened fiber material, adsorb large particles.	1周~2个月 1 weeks ~ 2 months
NCW08302	PP中效过滤棉 PP medium filter cotton	灌胶密封，避免漏烟，容尘量大 Sealant seal, avoid leakage of smoke, large amount of dust.	3~5个月 3~5 months
NCW08303	玻纤中效过滤棉 Glass fiber medium filter cotton	有效过滤空气中穿透力强的小至0.3um微粒 Small 0.3um particles effectively filter the air penetrating	3~5个月 3~5 months
NCW08304	活性碳除味滤芯 Active carbon filter core	纳米级复合分子筛，有效吸附有毒有害气体 Nanoscale composite molecular sieve to effectively adsorb toxic and harmful gases	6~12个月 6~12 months

焊锡烟雾净化系统工程

Soldering tin smoke purification system engineering

- 根据大楼的结构特点，就近开设风井，划分排风和补风系统
- 排风和补风系统达到风量平衡，保持室内-5Pa~-10Pa的负压，防止有害气体的散逸，保证一线人员的身体健康
- 采用智能变频控制系统，节能降噪，实现夏天补冷风、冬天补暖风，维持室内温度的舒适性
- 设备进风口处设有阻火器，阻留放电火花，利用重力吸收粗粒尘埃，微粒尘埃被滤芯吸收，再经过活性碳过滤净化达标后排出
- 万向吸烟臂可任意调整方位，适用于易产生烟雾的手工焊锡产线、机器人自动焊锡流水线、流水线激光打标等场所
- According to the structural characteristics of the building, the nearest open air shaft, exhaust system and air division.
- Exhaust and ventilation system to keep indoor air balance, negative pressure -5Pa~-10Pa, prevent the harmful gases escape, ensure the health of staff.
- The intelligent frequency conversion control system is adopted to save energy and reduce the noise, achieve the summer cooling wind and winter heating, and maintain the comfort of the indoor temperature.
- The device is equipped with a flame arrester at the inlet, retaining the discharge sparks, absorbing the coarse particles with gravity, and absorbing the particulate dust from the filter element. After activated carbon filtration, it is discharged after reaching the standard.
- The universal smoking arm can be adjusted at any direction, which is suitable for the manual solder production line, robot automatic tin production line, pipeline laser marking, etc., which is easy to generate smoke.

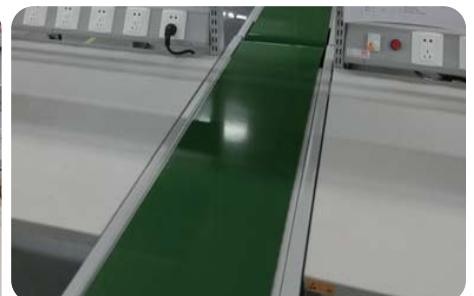

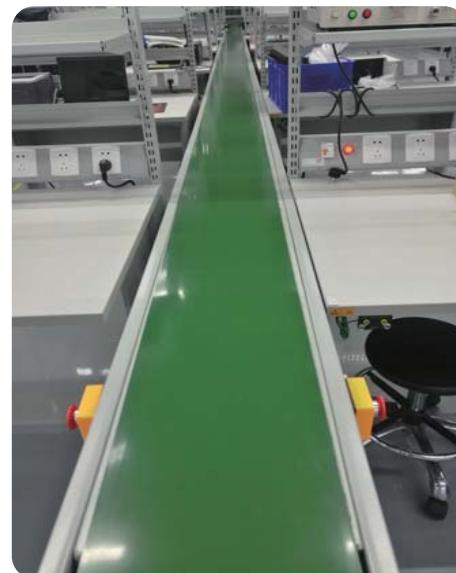

辊筒输送线 Roller conveyor line

- 依据现场实际需求合理化布局设计，多条辊筒线便于组合形成复杂的输送系统，完成多方面生产工艺要求
- 按需生产制作，轻松实现物料输送，可靠性高，维护方便
- 滚道线内常用宽度有200mm、300mm、400mm、500mm、600mm等
- 转弯滚道标准转弯内半径为300mm、600mm、900mm、1200mm等
- 直段辊筒常用的辊筒直径有38mm、50mm、60mm等
- The layout design is rationalized according to the actual needs of the field, and many roller lines are easy to combine to form a complex conveying system and complete the production process requirements in many aspects.
- Production on demand, easy to realize material delivery, high reliability, convenient maintenance
- The commonly used width in the raceway is 200mm, 300mm, 400mm, 500mm, 600mm and so on
- The internal radius of the standard turning of the turning raceway is 300mm, 600mm, 900mm, 1200mm and so on
- The diameter of the roller is 38mm, 50mm, 60mm and so on.

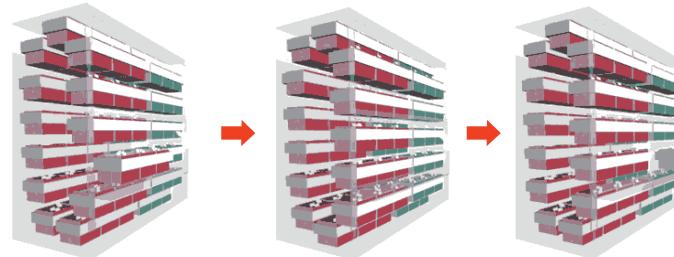

防静电皮带输送线 Antistatic belt conveyer

- 选用优质防静电皮带，结构简单、可靠性高便于维护，可依据用户现场实际需要定制
- 输送平稳，物料与输送带间无相对运动，有效避免物料受损
- 选用进口高品质电机，无噪音，适合于工作环境要求比较安静的场合
- 准输送带常用宽度范围为200mm~1200mm之间
- 转弯皮带机准转弯内半径为600mm、900mm等
- Selection of high quality anti static belt, simple structure, high reliability and easy to maintain, can be customized according to the actual needs of the user.
- Smooth transportation, no relative motion between material and conveyor belt, effectively avoid material damage
- Selection of imported high quality motor, no noise, suitable for a quiet situation in the working environment.
- The width range of the quasi conveyer belt is between 200mm~1200mm
- The inner radius of the quasi turning of the turning belt machine is 600mm, 900mm and so on

防静电垂直回转自动货架**Antistatic vertical rotary automatic rack**

- 由主体框架、可移式箱斗、驱动系统、传动系统、控制系统、安全系统等十几个部分组成
- 通过提取器的升降运动，将存放物料的托盘取出或移至合适的货位
- 入口处自动检测货物高度，以快捷方式将物料存放在最佳库位，全部操作实现自动化存取过程
- 自动、合理的安排库内有效存储空间
- 用于存放电子元器件、半成品、辅料、零件、医疗器材等
- It is composed of more than ten parts of the main frame, the movable box bucket, the driving system, the transmission system, the control system and the security system.
- The lifting movement extractor, material storage trays will be removed or moved to the appropriate location
- The entrance automatically detects the height of the goods and stores the materials in the best repository in a fast way. All operations can achieve automated access process.
- Automatic and reasonable arrangement of effective storage space in the library.
- Used for storage of electronic components, semi-finished products, accessories, parts, medical equipment, etc.

**防静电垂直升降自动货架****Antistatic vertical lifting automatic rack**

- 以托盘为存储单元的自动化仓储货架设备，高度可依据需要定制
- 通过提取器的升降运动，将存放物料的托盘取出或移至合适的货位
- 入口处自动检测货物高度，以快捷方式将物料存放在最佳库位，全部操作实现自动化存取过程
- 自动、合理的安排库内有效存储空间，适合存放尺寸差异较大和形状不规则的物品
- 用于存放电子元器件、半成品、辅料、零件、医疗器材等
- An automated storage rack with a tray as a storage unit, which is highly customizable.
- The lifting movement extractor, material storage trays will be removed or moved to the appropriate location
- The entrance automatically detects the height of the goods and stores the materials in the best repository in a fast way. All operations can achieve automated access process.
- Automatically and reasonably arrange the storage space in the library, which is suitable for storing items with large size difference and irregular shape.
- Used for storage of electronic components, semi-finished products, accessories, parts, medical equipment, etc.

静电中和离子风机

Electrostatic neutralization ionizing blower

- 优质钨制电极，更可靠更耐久，实行电晕放电，高频电压产生大量的正负离子，快速中和物体表面所带的电荷
- 离子风机可独立运行，亦可接入静电防护监控系统，实现远程控制与查看
- 出风口配置离子传感器，实时监视静电中和状态
- 运用流体力学原理设计，高效率、大风量快速中和静电
- 主要应用在电子生产线、维修台、电子产品的静电防护区域
- High quality tungsten electrode, more reliable and durable, the practice of corona discharge, high frequency voltage produced a large number of positive and negative ions, quickly neutralizing the charge on the surface of the object.
- The ion fan can operate independently and can also be connected with the electrostatic protection monitoring system to realize remote control and view.
- The air vent is configured with an ion sensor to monitor the static state in real time.
- Based on the principle of hydrodynamics, high efficiency and high air volume and static electricity are used.
- It is mainly used in the electrostatic protection areas of electronic production lines, maintenance stations and electronic products.

静电放电模型的建立

Establishment of electrostatic discharge model

- 依据GJB3007A、ANSI/ESD S20.20和IEC61340-5-1相关标准，根据EPA现场建立有效的静电放电模型
- 掌握静电放电原理，工作中快速判定静电发生原因，并及时处理有效避免静电带来的危害
- 查验静电敏感器件静电防护等级，规范日常工作管理，细节着手防范静电损害元器件
- Based on the related standards of GJB3007A, ANSI/ESD S20.20 and IEC61340-5-1, effective electrostatic discharge model is established on the basis of EPA.
- Grasp the principle of electrostatic discharge, quickly determine the cause of static electricity, and deal with the harm caused by static electricity in time.
- Check the electrostatic protection level of electrostatic sensitive devices, standardize the management of daily work, and take precautions against electrostatic damage components.

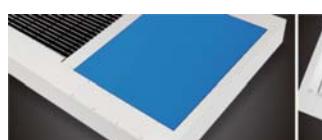

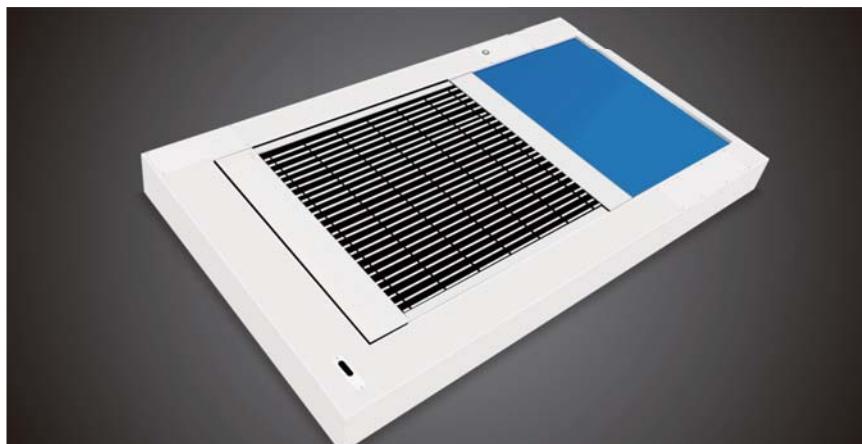

静电释放鞋底清洁机

Sole cleaner with electrostatic release function

- 机身采用304不锈钢钣金成型工艺，毛刷选用耐磨杜邦丝，洁净效果持续保持在99%以上
- 具有静电释放功能，有效降低人体携带的静电
- 同步带平稳运行，超低噪音，内含加强钢丝，增强毛刷寿命
- 配置欧姆龙红外传感器，实现瞬间感应启动，内置漏电、过载、短路保护，设备安全可靠
- 双水泵设置支持持续污水过滤，具有自动补水、排水功能
- 附赠PVA强力吸水海绵，保证鞋底水分快速吸干
- The fuselage adopts 304 stainless steel sheet metal forming process, and the brush selects the wear-resistant DuPont silk, and the cleaning effect is kept over 99%.
- It has the function of electrostatic release, which can effectively reduce the static electricity of the human body.
- Synchronous belt running smoothly, ultra low noise, reinforcing steel wire and reinforcing brush life.
- OMRON infrared sensor is configured to realize instant induction, built-in leakage, overload, short circuit protection, safety and reliability of the equipment.
- Double water pump setting supports continuous sewage filtration and has automatic water supplement and drainage function.
- With PVA super absorbent sponge sole, ensure rapid water drain.

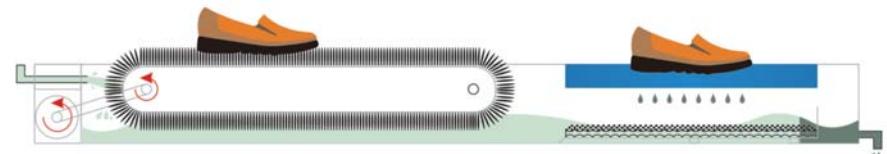

技术参数 Technical data

产品编号 Product NO.	NCL39085	NCL57130	NCL57180	NCL57280
清洗区尺寸 Cleaning area size	480 x 390	860 x 570	1200 x 570	1800 x 570
吸干区尺寸 Dry area size	260 x 390	410 x 570	410 x 570	840 x 570

静电释放鞋底清洁机

Sole cleaner with electrostatic release function

- 电机带动毛刷使毛刷与鞋底产生相对运动形成摩擦达到清洁鞋底的效果
- 通过水泵抽取干净水喷洗毛刷，从而达到循环清洁的效果
- 所有污渍沿水流方向从另一侧排水口排出，较大的污渍则被提渣篮过滤网拦截，便于手工清除
- PVA强吸水海绵快速吸干鞋底多余水分，地面不留水渍
- The motor drives the brush to produce a relative motion between the brush and the sole to form the effect of friction to reach the clean sole.
- The clean water spray washing brush is extracted by the pump, so as to achieve the effect of circulation cleaning.
- All the stains are discharged from the other side in the direction of water flow, and the larger stains are intercepted by the filter net of the slag basket, which is easy to remove by hand.
- PVA super absorbent sponge quickly sucks the excess moisture from the sole and does not keep water stains on the ground.

人体静电防护综合测试仪

Comprehensive test instrument for human electrostatic protection

- 根据ANSI/ESD S20.20标准，必须检测人体通过手腕带和防静电鞋接地合格
- 可同时测试手腕带、左鞋、右鞋是否合格；也可关闭手腕带测试，只测试防静电鞋
- 可以设置测试上下限阻值以符合不同规范
- 测试时，应避免长时间工作使得按键机械损坏
- According to the ANSI/ESD S20.20 standard, the human body must be tested to pass the ground through the wrist belt and antistatic shoe.
- Can test the wrist belt, the left shoe, the right shoe to be qualified at the same time; also can close the wrist strap test, only test the antistatic shoe.
- The test upper and lower limits can be set to conform to the different specifications.
- During testing, long time work should be avoided to make the key mechanical damage.

组合编号 | Product NO.NCY19279

产品编号 Product NO.	产品名称 Product name	数量 Qty
NC19275	测试仪 (含黄色背板) Test instrument (containing yellow backboard)	1
NC50406	不锈钢脚踏板 (左/右脚独立) Stainless steel treadle (left / right foot independent)	1
NC50405	连接线 (连接测试表和脚踏板) Connecting cable (connection test meter and foot pedal)	1
NC19255	重型支架 Heavy bracket	1

静电防护综合测试门禁系统

Comprehensive test entrance guard system for electrostatic protection

- 人体静电防护综合测试结合电子门禁，加强静电问题管控
- 可以与三轧辊、翼闸通道以及电子门锁等任意结合使用，测试通过材放行或开门
- 可同时测试手腕带、左鞋、右鞋是否合格；也可关闭手腕带测试，只测试防静电鞋，符合国际规范
- 科学的信息化管理，精确有效，自动生成完整的ESD测试管理报表
- 系统可独立单机操作或实时联网监控，测试时间2~3秒，反应快速避免高峰期拥堵
- The comprehensive test of the human body electrostatic protection combined with the electronic entrance guard to strengthen the control of the static electricity problem.
- It can be used in combination with three roll, wing gate and electronic lock, and the test can be released or opened.
- Can test the wrist belt, left shoe, right shoe to be qualified at the same time; also can close the wrist band test, only test the antistatic shoes, conform to the international standard.
- The scientific information management, accurate and effective, automatically generates a complete ESD test management report.
- The system can be independent single machine operation or real-time network monitoring, test time 2~3 seconds, response quickly avoid peak congestion.

组合编号 | Product NO.NC11108

静电防护综合测试闸机监控系统

Monitoring and control system of static electric protection test brake machine

- 闸机监控系统，具有安全防范和人员管理功能，广泛应用于生产车间人员进出管理
- 结合人体静电防护综合测试系统，有效防范进入静电防护区域的静电危害，减少静电敏感器件损伤
- 标配读卡器全面兼容各类IC卡、ID卡，采集的数据资料独立管理，实时记录
- 软件系统自主研发，安全可靠，维护方便，完整的测试不超过3秒钟，进入方便快捷
- 单机版不支持测试数据保存功能，网络版具有测试数据实时保存和查询功能
- The control system of the brake machine has the function of security and personnel management, and is widely used in the management of the workers in the production workshop.
- Combined with the comprehensive test system of human electrostatic protection, it is effective to prevent the static damage to the electrostatic protection area and reduce the damage of the electrostatic sensitive device.
- The card reader is fully compatible with all kinds of IC cards and ID cards, and the data and data collected are managed independently and recorded in real time.
- The software system is independently developed, safe and reliable, easy to maintain, complete test not more than 3 seconds, easy to enter.
- The single machine does not support the test data preservation function, and the network version has the function of real-time storage and query of test data.

防静电智能监控器**ESD intelligent multifunctional monitor**

- 高端智能集成电路设计，内设TVS静电防护器件，保证产品自身不受静电损坏
- 静电接地线路、人体静电通接地通路实时连续性智能监测
- 实时监测，静电实时安全泄放，静电泄放速度<2s，人体静电电压低于10V
- 适用于电子研发实验室、小型电子生产、组装等静电防护区域的使用
- High end intelligent integrated circuit design, set up TVS electrostatic protection device to ensure that the product itself is not damaged by static electricity.
- Real time continuous intelligent monitoring of static grounding circuit and human electrostatic connection ground path.
- Real-time monitoring, real-time electrostatic discharge, electrostatic discharge speed < 2S, human static voltage less than 10V.
- Applicable to electronic R & D laboratories, small electronic production, assembly and other electrostatic protection areas.

组合编号 | Combination NO. NCA97131

静电电场非接触检测系统**Non contact detection system for electrostatic field**

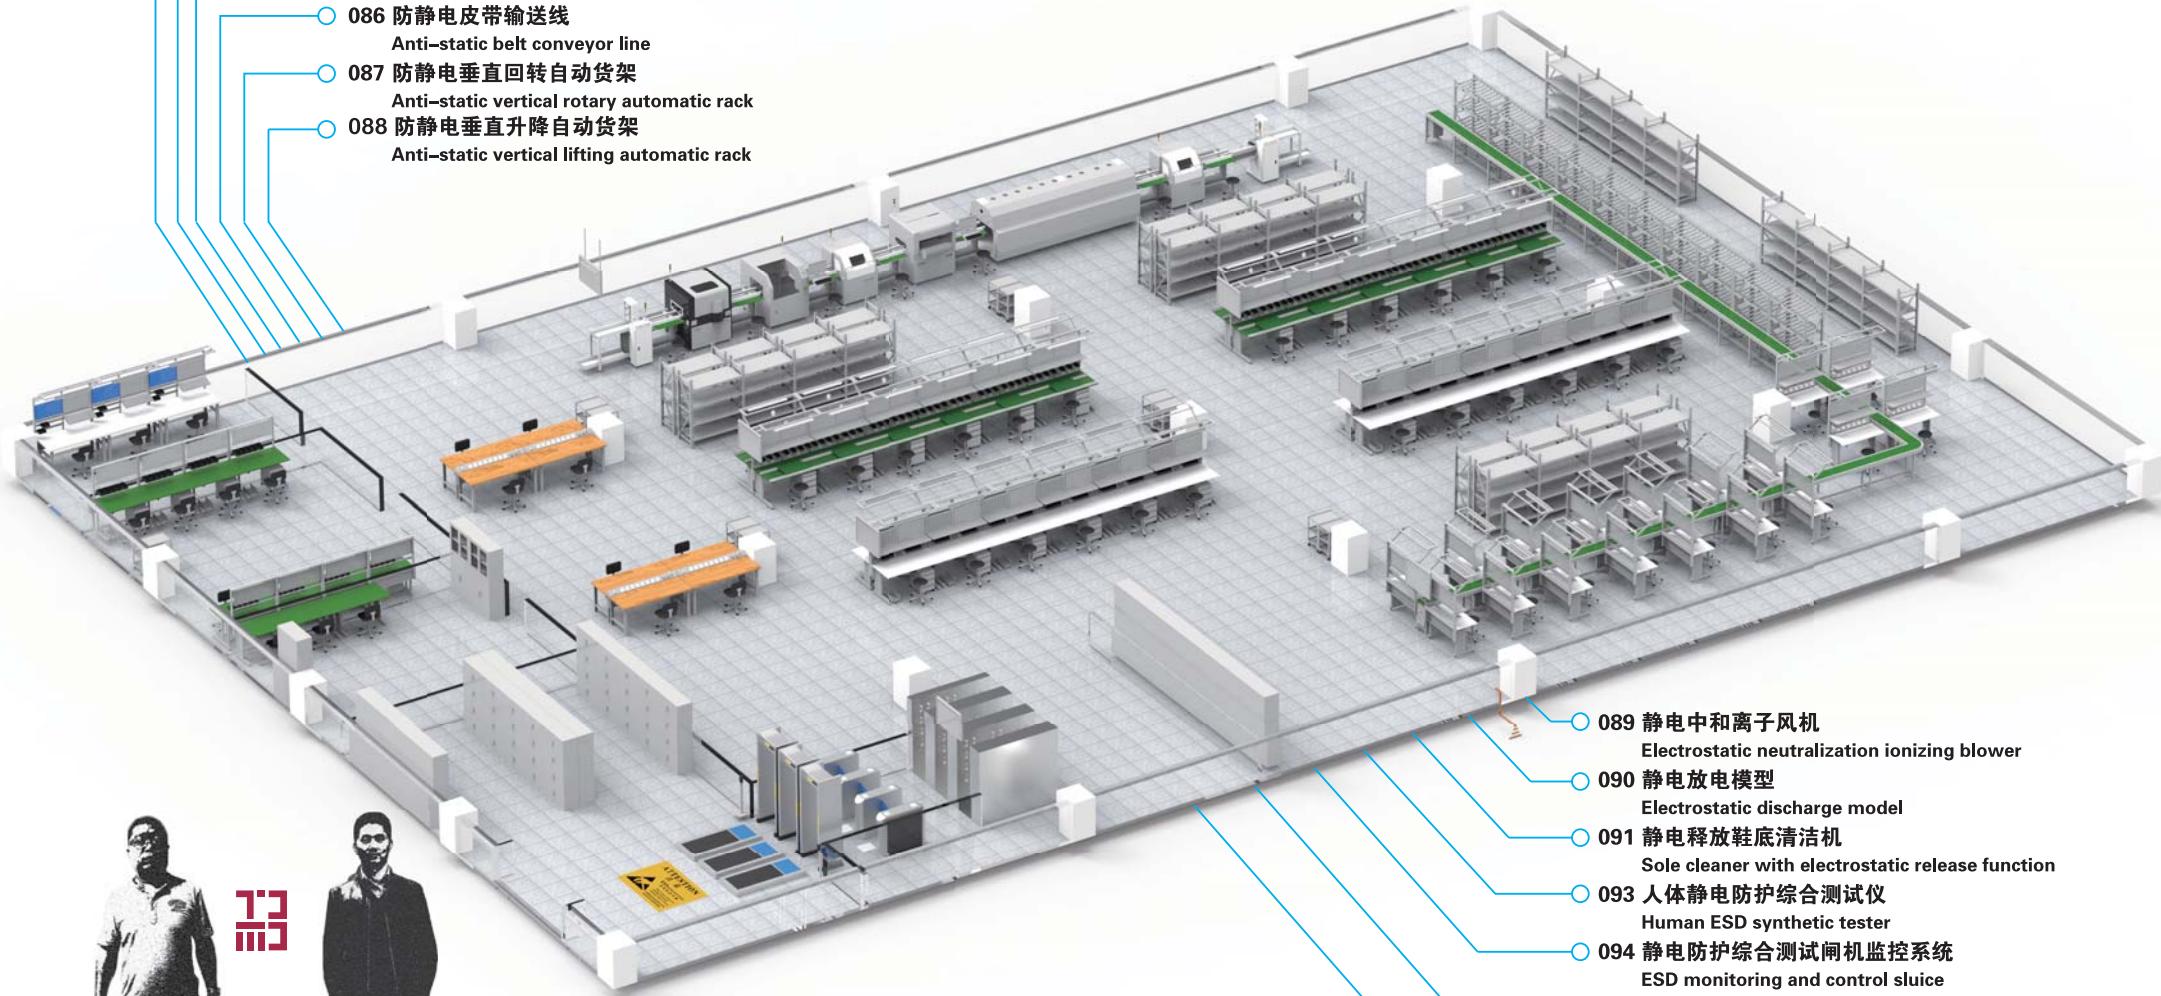

- 运用国际先进的静电电场传感器，实现远距离探测目标静电电场并获得精准的数字信息，使静电可视可听
- 配合静电防护装备的应用，可以有效的将静电防护区域静电电压控制在正负10伏以内
- 适用于进入静电防护区域的检测，并排查静电电源，有效避免静电无法感知带来的危害
- The use of advanced international electrostatic field sensors to achieve remote detection of the target electrostatic field and obtain accurate digital information, so that the static electricity can be audible.
- With the application of the electrostatic protection equipment, the electrostatic voltage of the electrostatic protection area can be effectively controlled within the positive and negative 10V.
- It is suitable for the detection of the electrostatic protection area and the static power supply, which can effectively avoid the harm caused by the static electricity.

**防静电智能监测管理系统****Anti static intelligent monitoring and management system**

- 高端智能继承电路设计，内设TVS静电防护器件，保证产品自身不受静电损坏
- 静电接地线路、人体静电通接地通路实时连续性智能监测
- 实时监测，静电实时安全泄放，使人体静电电压低于10V
- 软件自动生成日志，事件实时记录，可实现问题可追溯，方便生产过程及时调整改进
- High end intelligent inheritance circuit design, set up TVS electrostatic protection device to ensure that the product itself is not damaged by static electricity
- Real time continuous intelligent monitoring of static grounding circuit and human electrostatic connection ground path
- Real time monitoring, real-time static discharge of static electricity, the static voltage of human body is less than 10V
- The software automatically generates the log, the event is recorded in real time, the problem can be traced, and the production process can be adjusted and improved in time.
